**Subject:** "secret science"

EPA:

"We need to make sure their data and methodology are published as part of the record," Pruitt said in an exclusive interview with The Daily Caller News Foundation. "Otherwise, it's not transparent. It's not objectively measured, and that's important."

Why does Mr Pruitt require that only the most robust science be used to protect us from pollution, when he lets industry spread pollutants without evaluating the consequences until a serious problem appears?

Innocent until proven guilty should apply to people, not pollution.

Dave Powelson
