Subject: RE: Tax Reform

Tate-

When the Governor met with Admin. Pruitt at the White House the Governor mentioned a partnership between Nebraska Public Power District (NPPD) and Monolith Materials which will allow NPPD's Sheldon Station to become the largest hydrogen-fueled electric power station in the U.S. Admin. Pruitt had asked for more information on project. I have linked an article below but also wondered if this might be something we could add to the schedule for the visit. Ground has been broken on the project but they are still in the dirt moving stages. We could have a briefing for your team on the project if it is something of interest.

Let me if you have any other questions.

Thanks

Matt

Subject: Tax Reform

POTUS wants us to work a theme of tax reform into some of our events. I know your boss has been particularly active on this topic at the local level. Is there a way to fit this into the narrative of the lineXline you are sending today? Is your coalition already teed up on tax reform?
