

cc: Mr. Julian Frey

March 8, 1946

Mr. W. R. McAllister
Imperial Oil Limited
56 Church Street
Toronto, Ontario, Canada

Dear Mr. McAllister:

In reference to our telephone conversation, regarding our regulations for placing lead warning signs on pumps dispensing gasoline treated with tetraethyl lead, we are enclosing copy of a letter written today on the same subject to Service Station Equipment Company, Ltd., which I believe answers most of your questions.

Our contract under Section B. Health Regulations, Paragraph (b) reads as follows:

"The handling and mixing of said compound with gasoline and the distribution and sale of the treated gasoline shall be carried out in accordance with the rules and regulations now in existence or which may be hereafter issued from time to time by ETHYL and any government agency having jurisdiction in the premises."

This paragraph specifies that the oil company, which is a party to it, will abide by all rules and regulations issued by Ethyl Corporation from time to time and I am attaching a copy of our Rules and Regulations for distribution of gasoline containing tetraethyl lead which covers the display on each pump of the lead warning signs.

If you require any further information on this subject, please feel free to request it.

Very truly yours,

W. M. Turnley

WMT/h

RULES AND REGULATIONS

For Distribution of Gasoline Containing Tetraethyl Lead

Each filling station shall have prominently displayed on each pump from which gasoline containing tetraethyl lead is dispensed, either of the following two notices:

**CONTAINS
LEAD**

- (1) (TETRAETHYL) AND
IS TO BE USED AS
MOTOR FUEL ONLY,
NOT FOR CLEANING
OR ANY OTHER USE.
AVOID SPILLING.

- (2) FOR USE AS A
MOTOR FUEL ONLY
CONTAINS
LEAD
(TETRAETHYL)

Containers of gasoline treated with tetraethyl lead shall be labeled (with a sticker or decalcomania) with either of the following two notices:

**CONTAINS
LEAD**

- (1) (TETRAETHYL) AND
IS TO BE USED AS
MOTOR FUEL ONLY,
NOT FOR CLEANING
OR ANY OTHER USE.
AVOID SPILLING.

- (2) FOR USE AS A
MOTOR FUEL ONLY
CONTAINS
LEAD
(TETRAETHYL)

These signs shall be of metal or porcelain enamel and placed between the limits of four and five feet above the ground level on the face of each side of the pump at which delivery is made.

GASOLINE CONTAINING TETRAETHYL LEAD IS INTENDED AND SOLD ONLY AS A MOTOR FUEL AND FOR NO OTHER PURPOSE.

There is danger involved in handling all motor fuels, whether they contain tetraethyl lead or not. When breathed as a vapor in sufficient quantity, any kind of gasoline may produce serious results, and when allowed to remain in contact with the skin, it frequently produces irritation and blistering.
