Doctor Lanza
Assistant Medical Director
Metropolitan Life Insurance Co.
New York, New York

Dear Doctor Lanza:

Recently I have had X-Rays taken of four individuals exposed to silicosis and have had some varying interpretations as to pathology given by various local X-Ray men. Consequently, if it is your wish I would be very glad to send the X-Rays along with a brief history of exposure and any complaints that the patients may have in addition to chest expansion.

Should there be any additional information that you wish let me know and I will try to include same.

Thanking you again for your courtesy while in New York City and in regard to the X-Ray pictures you sent me our local X-Ray men insist that it is a case of healed military tuberculosis in spite of the history you gave me on the case.

Yours very truly,

Director of Personnel
Bendix Products Corp.

Dr. K. Selby,
Director of Personnel,
Bendix Products Corp.,
South Bend, Ind.

Dear Dr. Selby:

I am very glad to hear from you, and should very much like to see your X-ray pictures. If you will send them along with such clinical information and history material as you have available, I will return them and let you know how they look to us.

I am not surprised at what you tell me about your local X-ray men. It seems to me that X-ray experts are very prone to forget the fact that after all they are only looking at shadows and the amount of information which you can get from looking at a shadow is very limited.

With best regards

Sincerely yours,

A. J. Lanza, M. D.
Assistant Medical Director
