Dear Bob:

Thanks so much for your good letter of November 16th.
I understand your thinking much better and I am content with it.

I learned from U.S.P.H.S. that the research group has recommended approval of our vibration project but does not yet know whether they have enough money for it. I appreciate very much indeed the part you have played in helping us to get this very much needed basic research project under way. I feel sure that we will get started around the first of the year in one way or another.

I am sorry I did not get to the Cleveland meetings.
The flu bug hit me! Warm regards.

Sincerely yours,

Bill
