Dear Ken:

We concur, of course, with the suggested approach
for the ILZRO/SERA meeting on August 27th.

The report is obviously written with a pre-determined
view in mind, heavy in ominous implications and suggestive
of problems whenever there is an open question. Is our
input to be confined to technical questions or will it be
worth the effort of preparing editorial commentaries; will
there be further inputs through our trade groups, beyond
the August 27th meeting?

Yours sincerely,
