Subject: Sauget Sites - Area I

The recent 104e request on the Sauget Sites Area I (Dead Creek) and proposed NPL listing in October 1994 has necessitated a re-evaluation of workloads and assignments among the Remedial Project managers. Mike Light has agreed to assume responsibility for Sauget Sites Area I and will transition into this project over the next year as he completes the Woburn Surface Remediation and reduces his day to day involvement at Woburn. Steve Smith who is currently spending full time on Brio and Motco will retain responsibility for the Sauget Sites Area R Project (WGK Landfill) and litigation issues associated with WGK and Cerro Copper. Additional changes in Superfund Site responsibility will be made as appropriate to fully utilize the talents of the Remedial Project Managers and focus our limited resources on the Sites offering the major returns to the Chemical Group.

The Sauget Sites Area I Project has the potential to be a large, complex, multi-party PRP project with the involvement of all of the Sauget Industries due to their history of manufacture in the Village of Sauget. Mike Light brings to this project his strong management and technical skills and his teams recent and continued successes at Woburn.

Mike
