TO Mark Wood
FROM Jon Shepherd *JCS*
DATE January 30, 1985
SUBJECT 1985 Personnel Monitoring -
Routine Schedule

I have revised the personnel monitoring schedule for 1985 to reflect the changes in Plant B operations. Also, highlights of additional changes are:

- 1) Eliminate sodium hydroxide monitoring, per discussions with G.O.
- 2) Increase the number of short-term samples taken for certain Plant B job titles.
- 3) Decrease monitoring frequencies on certain jobs which have shown low exposure potential/results.

I would be happy to discuss any other changes which you feel are in order.
