Asbestos Diaphragm Preparation

cc: Mr. W. C. Strader

Mr. Wallace F. Armstrong

Ethyl Tower

R. C. A. Bock, M.D.

Baton Rouge Plant

Asbestosis

July 15, 1970

Last year a review was made of insulators and their work environment. Nothing of significance was revealed.

The diaphragm preparation job was inspected and no further evaluation was then deemed warranted. However, recently, following your inquiry, this job was specifically studied. No actual hazard is apparent and no action recommended.

We intend to maintain an awareness of the potential hazard of asbestos minerals and their use throughout the plant.

Roy C. A. Bock, M.D.
