Arlington, VA 22202

Sir:

I am the Facility Industrial Hygienist and presently very much involved in evaluating work practices, engineering controls and potential exposure problems. I also interface with our employees who handle bulk asbestos materials.

I would appreciate if the following items can be sent as a loan (30 days) or for permanent use:

1. The pamphlet "Asbestos: A Natural Substance for Modern Needs" - 10 copies
2. The following references specified in the above pamphlet.
 14. McDonald, J. C. et al, "Dust Exposure and Mortality in Chrysotile Mining, 1910-75", 37 Brit J Ind. Med. 11 (1980)
 15. Well, H. J. et al, "Influence of Dose and Fiber Type on Malignancy Risk in Asbestos Cement Manufacturing", 120 Am. Rev. Resp. Disease 345, 353 (1979)
 13. Baris, Y. I. et al, "Malignant Mesothelima and Radiological Chest Abnormalities in Two Villages in Central Turkey", 1981 Lancet 984 (1981)
3. Any training aids, slides or sources of contact for purchase.

Thank you for your assistance.

Sincerely,

Gary Hile
