RE: MANVILLE MERCHANDISE BULLETIN
Ref: Refractory Fiber Handling Recommendations

The attached Merchandise Bulletin regarding the captioned may be of interest to you. As noted in the bulletin, Manville is now affixing a label to their refractory fiber products to draw attention to proper handling procedures. However, this label is not an indication of any change in the product itself.

I have also included a brochure from Manville which discusses health and safety aspects of refractory fibers.

Do not hesitate to call upon your Industrial Hygiene contact if you have any questions in this area.
