

CLOTHING AND GLOVES

June 15, 1937

Mr. J. C. Gibson
The Pioneer Rubber Company
Willard, Ohio

Dear Mr. Gibson:

This is to acknowledge
receipt of your letter of May 26 and
sample of Thiokol Impregnated gloves.

We will advise you after
we have tested the permeability of the
product.

Very truly yours,

WFM:vr

Willard F. Machle, M. D.

PIONEER THIOKOL

(SYNTHETIC RUBBER)

Coated Work Gloves:

Resist oil, grease, gasoline, and acids, wear well, have a good grip, are more comfortable than rubber coated gloves, warmer in cold weather, cooler in hot weather.

The nearest material to leather without leather's disadvantages. Become soft and pliable with use.

Particularly suitable for all work where hands should be protected and for handling materials that are hard on gloves.
