Enclosed is a copy of Proposed Regulations issued by USDA, FDA and EPA (TSCA) dealing with PCB in meat, poultry and eggs, food, feed and food packaging materials, and Agricultural Pesticide and Fertilizer Facilities. These proposed regulations may impact your operations. Don Cayard is exploring the TSCA regulations and their impact on Ag. Comments are due July 7 or 8 depending on the agency.

If comments are appropriate, I will be happy to serve as a coordinator to ensure that the comments to the various agencies are consistent. Please let me know if you plan to develop comments.
