INTER-OFFICE CORRESPONDENCE

TO	Dr. R. A. Kehoe	ADDRESS	Cincinnati
FROM	Mr. J. H. Schaefer	ADDRESS	New York
SUBJECT	Lead Hygiene	DATE	January 28, 1946

PERSONAL & CONFIDENTIAL

I am very much obliged to you for your letter of January 14 commenting on the material which I sent to you from the Lead Industries Association. I am certainly glad to get your straightforward views on this subject.

I felt somewhat concerned with the way things were going in the Association and certainly the background you have had will be invaluable to me. I have not quite made up my mind as to the best approach to this and would like to let the matter soak for a while and try to go along until an opportune time presents itself to get this matter across diplomatically and without too much revelation of the source of most of my information.

I am going to do something about it, of course, but feel I must select the medium that will not cause any controversy or antagonism. I will let you know how matters progress.

J. H. Schaefer

3-2

P.S. I just received a call from Felix Wormser suggesting that you be present in his office at 10:00 on Thursday, February 7th to discuss in an informal way plans for the American Medical Association Symposium which will be shared in jointly by the Lead Industries Association on the subject of lead poisoning. Your friend Dr. Aub, Dr. Peters and others will be there. I told Mr. Wormser that I certainly felt that you could very substantially contribute to this subject, and as far as I was concerned it would be a very good plan to have you there. However, I did not know

what your plans were, and would like to know what you think of it. Would you give me a call on this at your earliest convenience so that I could set it up. I am leaving on the 6th for Columbus and Baton Rouge and won't be back until the 18th of February. This invitation to some extent may be an entree to plug some of the views which you wrote me about and I acknowledged in the foregoing.

J. H. S.
