Surgeon General H. S. Cumming,
Public Health Service,
Washington, D. C.

Dear Dr. Cumming:

I have gone over your letter concerning
the new sign for the pumps for tetraethyl lead gasoline,
and entirely approve of it, and I have a note from Dr. Hunt
saying that he sees no objection and, if I feel the same
way, I might write you that we both approve of the new
sign.

With very kind regards,

Sincerely yours,

David L. Edsall, M. D.
Dean.
