April 17, 1931

Dr. Robert H. Kahoe
College of Medicine
University of Cincinnati
Cincinnati, Ohio

Dear Doctor Kahoe:

On March 12, 1929, you furnished us a very comprehensive and sympathetic statement of your study of the case of Mr. [REDACTED] who since about June, 1924, has been suffering physical and psychic consequence of tetraethyl lead poisoning at that time.

For the past two years Mr. [REDACTED] has been receiving disability benefits under a policy of insurance in this Association held by him. We now have under consideration the question of the justification of the further and future continuance of these disability benefits. It is very difficult to appraise the merits of the case, and to form a just decision as to what the applicant is entitled to under the circumstances.

We understand that you have made other examinations of this claimant since the time of your report to us. We will therefore appreciate it if you will favor us with another statement giving the results of your latest observations of the patient, and your opinion as to the actuality and degree of his disability.

Whatever further information is furnished will be greatly appreciated.

Yours very truly,

J. B. Nichols
J. B. Nichols
Medical Director.
