TO DO TOUCH

As outlined in my sales report of May 20th, Budd's Mr Garth Johnson wants a letter from Monsanto indicating that both PYDRAUL F-9 and 312 are biodegradable and do not represent a threat to the environment. He has been visited by the Ontario Water Resources Commission and the City of Kitchener, Ontario water people, who were enquiring as to his handling precautions re chlorinated biphenyls.

I advised him that you would be in touch by letter or telephone. The number in Kitchener is (519) 744-7141.

Would you kindly advise me as to action taken.

Thank you.
