Dear Mr. Carter;

Re; Thermal-King Insulating Cement.

The new Thermal-King Cement does not contain asbestos.

We had to make some changes in our formula because of (OSHA) standards on asbestos.

In eliminating asbestos we had to add vermiculite to obtain slide bulking and better trowelability.

The heat limits (1800°) and coverage will remain the same as the old Thermal-King Cement formula.

We hope this meets with your approval.

411084 1712

Very truly yours,

Leo Mascarello

Leo Mascarello,Pres.

Hoffman Insulation Mfg. Co.

Dan -
This material was used for packing (or insulation) around forged die blanks at NK CMS to reduce rate of cooling.

Gentlemen:

Over a number of years, we have used one of your products "Thermal King" at our New Kensington, Pa. location with our most recent purchase having been in 1971. We are interested in learning whether this product contains asbestos and if so, in what proportion in order to be able to establish safe practices for using the material as required under the Occupational Safety and Health Administration (OSHA) Standard for asbestos.

We would appreciate very much what information you can provide us in this matter.

Sincerely yours,

ROBERT P. CARTER
Industrial Hygiene Engineer

Bob
Do you have any info on this? If not how about checking with Betty Stiffler.
Thanks,
Tom
