OFFICE OF THE  
EXECUTIVE SECRETARY

(b) (6)

Mr. Scott Pruitt, Administrator  
Environmental Protection Agency  
1200 Pennsylvania Avenue, NW  
Washington, D.C. 20460

(OPEN LETTER)

Dear Administrator Pruitt:

Congratulations on your appointment as Administrator of the EPA. One of several rogue organizations perpetrated on American taxpayers by Congressional majorities who in establishing it displayed that their Oath of Office was a FRAUD.

There is no authority under the U.S. Constitution and it's Tenth Amendment for the EPA to exist.. Knowing a bit about your background and President Trump, I am encouraged to think *your administration* may be devoted to the dismantling of this monstrosity and removing it from the backs of our taxpayers.

As you may be aware it is necessary for rogue organizations to occasionally develop, or "invent crisis's " to justify their existence. Both the CIA and the EPA have been good at that.. Possibly if I review several of the "emergencies" which were invented by the EPA it may help you in accomplish our purpose.

In the early days of the EPA, they had to "save the spotted owl". In the EPA's unreasonable regulations imposed on property owners to "save the owls" it developed that when property owners spotted an owl, that might be "spotted", the owl was promptly shot. No property owners could risk finding an owl on his property that might be spotted. There is no question but that owls in general suffered badly. If the spotted owl survived it was in spite of the EPA, not because of anything EPA had done..

Years later after the owl issue had "flown away" EPA "discovered" the GSP oil used as the cooling oil in electrical distribution transformers was "deathly poisonous". So much so that where a pint or so of this oil had been spilled, truck loads of the earth in the area had to be hauled off to God only knows where. About that same time lightning destruction of rural electric distribution transformers was excessive. As electric distribution developed in rural areas it became clear that transformers, as they were being built, were not capable of surviving the lightning exposure that existed on long rural lines.. I was a young E.E. in my early twenties at the time and along with two young engineers my age we got the assignment to examine a number of the failed and destroyed transformers and solve the problem. My associates and I practically bathed in GSP transformer cooling oil for several months. We all lived through our retirement and I am approaching my 98<sup>th</sup> year, and while this may be upsetting to EPA I am enjoying life, in spite of the GSP transformer oil I may still be digesting..

The illegal alien who Congress allowed to masqueraded in the White House as "President" for eight years, was planning to make a tax agency out of the EPA ---DON'T LET IT HAPPEN. Congratulations, and Best Wishes.

Sincerely,

  
Frank B. Turberville, Jr.

Letter to the Editor

# Dismantle the EPA immediately

**To the editor:**

Dear Administrator Scott Pruitt:  
Congratulations on your appointment as administrator of the EPA. One of several rogue organizations perpetrated on American taxpayers by congressional majorities who, in establishing it, displayed that their oath of office was a fraud.

There is no authority under the U.S. Constitution and the 10th Amendment for the EPA to exist. Knowing a bit about your background and President Trump, I am encouraged to think your administration may be devoted to the dismantling of this monstrosity and removing it from the backs of our taxpayers.

As you may be aware it is necessary for rogue organizations to occasionally develop, or "invent crises" to justify their existence. Both the CIA and the EPA have been good at that. Possibly if I review several of the "emergencies" which were invented by the EPA it may help you in accomplishing our

purpose.

In the early days of the EPA, they had to "save the spotted owl." In the EPA's unreasonable regulations imposed on property owners to "save the owls," it developed that when property owners spotted an owl that might be "spotted," the owl was promptly shot. No property owners could risk find an owl on his property that might be spotted. There is no question but that owls in general suffered badly. If the spotted owl survived, it was in spite of the EPA, not because of anything EPA had done.

Years later after the owl issue had "flown away," EPA "discovered" the GSP oil used as the cooling oil in electrical distribution transformers was "deathly poisonous." So much so that where a pint or so of this oil had been spilled, truckloads of the earth in the area had to be hauled off to God only knows where. About that same time, lightning destruction of rural electric distribution transformers was excessive. As electric distribution developed

in rural areas it became clear that transformers, as they were being built, were not capable of surviving the lightning exposure that existed on long rural lines. I was a young electrical engineer in my early 20s at the time and along with two young engineers my age, we got the assignment to examine a number of the failed and destroyed transformers and solve the problem. My associates and I practically bathed in GSP transformer cooling oil for several months. We all lived through our retirement, and I am approaching my 98th year. While this may be upsetting to the EPA, I am enjoying life, in spite of the GSP transformer oil I may still be digesting.

The illegal alien, who Congress allowed to masquerade in the White House as "president" for eight years, was planning to make a tax agency out of the EPA — don't let it happen.

Congratulations and best wishes.

Danville R & B:

In my letter in 2/17/17 R & B 3<sup>rd</sup> Paragraph; You inserted an "s" where an "m" should have been, making the Word "say" where "may" should have been. This implies that I am quoting Administrator Scott Pruitt, which I certainly am not. A prompt correction of this mistake is necessary...>>

Washington, DC 20460

Dear Administrator Pruitt: *Scott:*

Re: Thank You

On behalf of the Oklahoma State Regents for Higher Education, I want to thank you for taking the time out of your schedule to speak at our Oklahoma's Promise Day at the State Capitol program on Tuesday, April 18. We have received many positive comments regarding the event, and your remarks and attendance greatly contributed to the success of the program. Again, thank you for your continued support of Oklahoma higher education and the Oklahoma's Promise scholarship program.

Sincerely,

  
Glen D. Johnson  
Chancellor

GDJ/ks

*Scott -  
I look forward to seeing  
you again soon. Let's schedule  
lunch when you know you are  
coming to OKLA. City.*

*Kevin*
