This Label

40 years has stood for the best that a House paint, Sherwin-Williams Paint (SWP), is made of pure white lead, pure zinc, pure linseed oil and the necessary coloring pigments and driers. These ingredients are combined in exactly the correct proportions according to carefully tested formula and are thoroughly mixed and ground in powerful machinery. Good paint is economy. It covers most surface, looks best and wears longest. When you paint your house, be sure that the SWP label is on every can you buy. Each can full U.S. standard measure.

The Dixie Land building, painted with S. W. P. Interior work finished with The Sherwin-Williams Varnishes. This is one of the largest colored picture frames in the world. Employed two operators.

THIS picture illustrates one of the many big buildings throughout the south painted with *The Sherwin-Williams Paint*. It represents in a small way the great progress that *S. W. P.* has made in the south.

S. W. P. has made its way in Dixie Land through its peculiar adaptability to climatic conditions, through its ability to resist the hot sun and to retain its gloss and color in good condition for the longest time. It gives safe results always and is the logical paint for you to use, whether your property is large or small, factory or dwelling.

S. W. P. is made in 18 good shades giving the widest range of artistic color combinations. If you have any trouble in deciding on what colors to use send us direct or through the local *S. W. P.* agent a photograph of your building and our special artist will submit suitable color combinations free of charge.

We make good paints and good varnishes for all purposes. See the *S. W. P.* agent in your town for complete list.
