Dear Dr. Hueper:

Was glad to hear from you again. I certainly have not forgotten the lung cancer mesothelioma asbestos problem. As a matter of fact I have gotten quite some data accumulated but have been prevented, because of the pressure of other work, to finish them. We have collected approximately 50 mesotheliomas in eastern Pennsylvania which have occurred over the last 5 years and we are now in the process of getting occupational histories on these people which, as usual, were not found in the hospital records.

As you may or may not know I have tried time and time again to get Dr. O'Donnell to publish his material but I am not sure I have accomplished anything. We will certainly publish our own findings and I hope to be able to send you what we have for review within the next 6 months.

I do hope to see you again in the near future and if you get bored with your retirement come up and see me sometime. It's less than 2½ hours from here to where you live.

Most sincerely yours,

Jan Lieben, M.D., Director
Division of Occupational Health
