Mr. Herbert Abraham, President
The Ruberoid Company
New York City, N.Y.

Re: License under U. S. Patent #1,972,500

Dear sir:

In order that I may determine more accurately whether an adequate market is being provided for licensed materials I would appreciate it if you would have the following questions answered and certified to by an executive officer of your company.

It would also be appreciated if you will set up your records in such way that you can answer the same questions at regular intervals.

1. Are you at present using the process under license?
2. Are you selling any materials included in the "List of Materials" attached to your contract in which the process is not used, except as provided in specific exceptions. If so please detail.
3. Are you selling any paper, flat or corrugated, for conversion into licensed materials in which the patented process is not included. Please give details and quantities.
4. Do you have any suggestions for facilitating the sale of licensed materials.

Your courtesy in supplying full details on the above will be appreciated.

Very truly yours,

Donald Tulloch Jr.
