Robt. A. Kehoe, M. D.,
University of Cincinnati,
College of Medicine,
Cincinnati, Ohio.

Dear Doctor:

Your letter of October 30th to Mr. [REDACTED] has been turned over to me for attention, for the reason that we represent him in suit brought by an employee who claims that he was injured by exhaust from an automobile which was in front of the one under which he was working, and the automobile in which the engine was running contained Ethyl Gas, and that he was injured by reason thereof.

We have had this man examined and the doctors say that he has paralysis agitans. This injury, which he claims to have suffered, happened about five years ago. We will get in touch with his physician and have a report made up and sent to you.

Will be glad if you will give us such data as you may have upon your experiments. This case will be set for hearing some time in December, and will keep you advised as to any information we may get.

Thanking you for your interest, we beg to remain,

Yours very respectfully,

BERRY & McCULLOCH
