TO: A. E. Peterson
J. F. Queeny Plant

Sample Identification	Apparent PCB Level (Calculated As Aroclor 1242)	Mercury Level
Main Sewer Effluent February Composite	19.2 ppb	5.3 ppb
Main Sewer Effluent March Composite	26.9 ppb	6.8 ppb

As you have probably noted, both the PCB and mercury levels appear to be rising in the last few months. If we can help find out why the levels appear to be increasing by providing more analytical support, please let us know.

E. S. Tucker
