R. T. Halstead - Hanville

84-S Sheet
E. I. Du Pont de Nemours & Co.
Wilmington, Delaware

Please keep us advised regarding Waukegan's progress on the redevelopment of the 84-S sheet.

As you know, Du Pont are pressing us vigorously for small but important shipments of this product to them, and I hope that we will be back in production on a non-questionable basis shortly.

I understand that the blue fibre which we have currently been trying to use is too lefty, and does not produce a satisfactory finished product. You are making the necessary moves to secure a less lefty fibre, but I believe you have to clear it first with our Division to determine the availability.

H. R. Poulson
