Q Was it different material than what you had been provided while you were at Bendix?

A I don't really understand your questioning. It was new material that came -- I didn't carry-over any old material, there was no relationship with SAE before I came to the FMSI. And when I went with FMSI I was a member -- they invited me to go back on the Brake Lining Subcommittee which I did. So the files would have started in 1970 or '71 whenever I started with FMSI.

Q While you were at FMSI, during what years did you attend SAE conventions?

MR. MENDRZYCKI: Objection.

A Probably -- probably -- it was probably from 1971 or '72 on.

Q Until you retired?

A Until I retired.

Q What is the first convention you recall where basis was mentioned at an SAE proceeding?

A I cannot recall.

Q As you sit here today, do you recall receiving any information from the SAE regarding asbestos?

MR. MENDRZYCKI: Objection.

A I cannot recall.
