Dr. J. W. McClellan
Buick Motor Division
General Motors Corporation
1005 Leith Street
Flint, Michigan 48550 313-766-1416

Dear Dr. McClellan:

I have enclosed a copy of the paper on the toxicity of Aroclors that I promised you by phone. Pydraul 312 contains Aroclor 1242 which is the chlorinated hydrocarbon component of that fluid.

We would be interested in any information you may gather concerning any of our products. The symptoms that you outlined to me by phone are not those that we have experienced with any of our own operators or those of any of our customers to our knowledge.

Sincerely,

Maurice N. Johnson, M. D.
Assistant Medical Director
