Mr. John C. Riesinger
Westinghouse Electric
469 Sharpsville Avenue
Sharon, Pennsylvania

Dear Mr. Riesinger:

We thought you would be interested in having the enclosed article from the Washington Star about PCBs and also the comments from our Mr. John Mason.

We have been attaching the enclosed label about PCB pollution to all drum shipments of our electrical Aroclor materials. Shortly these same words, in black ink will be printed on the prime label of our packages and then we will not have to attach the separate small label.

Dr. Sloat who has discussed our PCB pollution statement with you, relayed your verbal approval for us to proceed to use this statement on all of our drum shipments of Inerteen.

We had asked for your written approval and were told that it would be sent shortly. As we have not yet received it, we will appreciate it very much if you would please send us your written approval at this time.

Thank you very much.

Cordially,

Paul G. Benignus
Marketing Manager
Dielectric Fluids
