Subject: C-8 testing at Spruance

I talked with Bud Mihal, OH coordinator at Spruance, about air monitoring data for C-8 and about blood testing of their employees for C-8. His response was that they haven't done air monitoring in a long time for C-8 (This surprised me!!!) and that blood monitoring for C-8 could be done on a voluntary basis with a lot of explanation of why we are doing it. He was going to look into the records they have and get back to me.
