Dear Mr. Boyett:

On September 29, 1976, at our request, I visited Zoechest Fiber Company in Spartanburg to monitor asbestos dust generation from our conventional 10P225 AAA untreated cloth during insulation operations. The samples taken were on actual workers fabricating and installing insulation at the construction site.

Below is a summary of the results:

SAMPLE NO.	SAMPLE MADE	OPERATION	MATERIAL PROCESSED	TOTAL TIME SAMPLED	FIBERS/CC		
					HIGH	LOW	I
HF-1	Personal	Fabrication Table	10P225 AAA Untreated	5 Hrs. 53 Min.	0.02	0.00	C
HF-2	Personal	Fabrication Table	10P225 AAA Untreated	5 Hrs. 50 Min.	0.02	0.00	C
HF-3	Personal	Fabrication Table	10P225 AAA Untreated	5 Hrs. 48 Min.	0.06	0.02	C
HF-4	Personal	Fabrication Table	10P225 AAA Untreated	5 Hrs. 40 Min.	0.04	0.00	C
HF-5	Personal	Fabrication Table	10P225 AAA Untreated	5 Hrs. 40 Min.	0.07	0.02	C
HF-6	Personal	Yarn Forming Line	10P225 AAA Untreated	1 Hr. 14 Min.	—	—	
HF-7	Personal	Yarn Forming Line	10P225 AAA Untreated	1 Hr. 1 Min.	—	—	

Attached is a copy of this report for Mr. Mariot Githens of Zoechest.

We thank you very much for your cooperation in getting permission from Zoechest to do the above counts.

Yours very truly,

RAYBESTOS MANHATTAN INDUSTRIAL PRODUCTS CO.
