JUNE 29, 1987

FROM: J.E. BARTON, INDUSTRIAL HYGIENE ASSISTANT, HEALTH & SAFETY
DEER PARK MANUFACTURING COMPLEX

TO: J.W. OVERMAN, PROCESS MANAGER, CAT CRACKING & GAS
DEER PARK MANUFACTURING COMPLEX

SUBJECT: INDUSTRIAL HYGIENE MONITORING RESULTS FOR ASBESTOS

Attached are area monitoring results for asbestos which were collected inside the CCU control room per request of P.M. Spicer. The samples were collected to determine background asbestos levels. The sampling results may be compared to the eight-hour TWA exposure guideline of 0.2 fiber/cc of air.

The results indicate asbestos levels were below the minimum limit of detection (0.01 fibers/cc). These results should be posted in an area accessible to all employees who work in the CCU control room.
