Mr. C. H. Borcharding, Jr.
Industrial Hygienist
Medical Department
4550 West 26th Street
Chicago, Illinois 60623

Dear Mr. Borcharding:

Industrial Hygiene improvements completed during 1967 and contemplated for 1968 are as follows:

1. NEW VENTILATION EQUIPMENT

1967 - Eight (8) Electric Roof Ventilators rated 21,800 CFM each, were installed in roof framing of Block Press Department to remove heat and fumes from area generated by steam heated presses.

2. IMPROVEMENT OF EXISTING VENTILATION

1967 - Three (3) window type fans were installed in monitor over North end of Book Press Department to remove heat and fumes generated by electrically heated presses. Each fan rated 14,000 CFM.

3. IMPROVED ILLUMINATION

1967-1968 - As Production Departments are relocated in expansion program, lighting methods are improved by fluorescent fixtures replacing incandescents and level of candlepower increased.

4. SUBSTITUTION OF NON-TOXIC MATERIALS FOR TOXIC ONES

1967 - None
