TITLE: Incinerate Plant Wastes

TSD JOB NO: 91370:4329

BUSINESS GROUP: Specialty Products

PRODUCT CODE: 81100 | PRODUCT: Aroclor | DEPT. NO.: 246

STATEMENT OF PROBLEM:

There are 35 M #/yr of chemical wastes from WGK disposed of at the sanitary landfill. It is increasingly apparent that the landfill will eventually be shut down by some Gov't. pollution agency. Other disposal means will have to be found for the 35 M #/yr. of wastes.

STATEMENT OF OBJECTIVE OF WORK:

To coordinate the effort to determine which plant wastes can be incinerated in the new aroclor incinerator.

ESTIMATED SAVINGS, NEW EARNINGS, OR OTHER BENEFIT (Show Calculation If Applicable)

No savings claimed. Use of the incinerator for other products will help defray the operating cost to aroclor. Aroclor projects 25% occupancy.

Major benefit lies in incineration - may be the cheapest or only means of future waste disposal for some products.

SUGGESTED SOLUTION, APPROACH, AND/OR REFERENCES:

Outline of data needed is outlined in memo, A. L. Rasmusse to A. E. Leisy, 3/22/71, "Incineration of Liquid Waste - WGK Aroclor Incinerator".

PROGRESS REPORTS

REPORT NO.	DATE

EST. TSD MAN DAYS	EST. TSD COST	ESTIMATED SAVINGS OR EARNINGS
90	$7200	None

COMMENTS:

TSD charges will be made against the product code of the product waste to be incinerated.
