Re: California Prop 65 Hearing April 14
Review of Carcinogenicity of 54% Chlorine PCBs

Attached for your information is a copy of our latest submission to the California Prop. 65 SAP presenting a more detailed look at 54% chlorine PCB health studies. This was submitted to the SAP April 1 by an express mail service company.

We've already noted a few typos and reference errors and will issue an "Errata" page prior to the hearing.

Please let me know if you have any questions or note any errors that should be corrected.

We are now in the process of preparing a 5 minute summary for oral presentation to the panel.

Sincerely yours,

John H. Craddock, Ph.D.
Regulatory Affairs Director
