OF PENNSYLVANIA
SCRANTON, PA.

Copy to Dr.G.H.Gehrmann, Wilmington, Del.

ADDRESS ALL COMMUNICATIONS
TO THE COMPANY

May 24th--1934.

Dr. Robert A. Kehoe,
University of Cincinnati,
Cincinnati, Ohio.

Dear Dr.Kehoe:

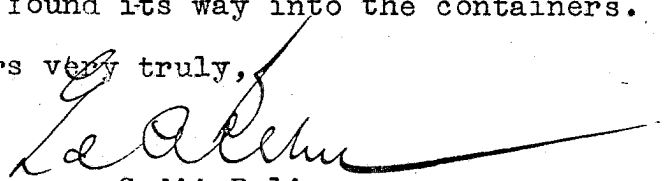

I received your letter of May 17th together with the express package containing the two containers ~~when~~ I got back from a trip last Sunday night.

In accordance with your instructions I started collecting the urine Monday noon and completed the amount required in 48 hours. I am sure 3 liters is approximately 3/4th's of the jug and as it was practically full I think this sufficient for your purposes. The other sample of excreta was collected in the container Tuesday and there was no artificial medication or cathartic used in obtaining it. Both sample were packed with great care in the box and shipped you from Scranton by express yesterday.

I presume it would be in order for you to mail, in duplicate, a copy of your findings to Dr.G.H.Gehrmann, at Wilmington, and without extra labor he can then send the duplicate copy on to my doctor, Dr.John D.Wilson, Scranton, Pa.

So far as I was able I followed your directions absolutely and trust no foreign material of any kind found its way into the containers.

Yours very truly,

G.d'A.Belin.

unless you are notified otherwise. I also advise
advising him to have feces as well as urine and other than that I
know nothing of the case.

I would suggest, however, that when you send him your
results you had better give him an interpretation as to what they
mean in comparison with the normal. Otherwise, I feel certain that
the results may go astray after they arrive in Scranton.

With my very best regards, I am

Yours very truly,

MEDICAL DIRECTOR'S OFFICE

May 15, 1934

Dr. Robert Kehoe
University of Cincinnati
Cincinnati, Ohio

My dear Dr. Kehoe:

I sent you a telegram yesterday afternoon requesting that you send containers for urine and feces to our Mr. G. de A. Belin, President of the duPont Company of Pennsylvania, Scranton, Pa.

Mr. [REDACTED] is a member of the duPont family and for some reason or other desires an estimation of the lead content of his urine. One of the executives of the Explosives Department came to me yesterday to determine how this could be done and I took it upon myself to make arrangements to have you do the work.

Of course, this will be a personal matter and you will charge Mr. [REDACTED] direct, as far as I know at the present time, and, unless you are notified otherwise. I also took the liberty of advising him to have feces as well as urine and other than that I know nothing of the case.

I would suggest, however, that when you send him your results you had better give him an interpretation as to what they mean in comparison with the normal. Otherwise, I feel certain that the results may go astray after they arrive in Scranton.

With my very best regards, I am

Yours very truly,

MEDICAL DIVISION
