Dr. John E. Middlebrook
701 Physicians and Surgeons Building
Minneapolis, Minnesota

Dear Dr. Middlebrook:

We have found a total of seven cases of pneumoconiosis associated with the vermiculite industry in Minneapolis.

We would like to assemble the x-rays of all seven of these individuals to compare them. I wonder if you would be kind enough to loan me the x-rays which were taken of Mr. Dennis Cleary, an employee of E. F. Nelson Company. This patient was seen by you in late February or early March of this year.

Very truly yours,

W. E. Park, M.D., Chief
Occupational Health Service

Public Health Center
250-South 4th Street
Minneapolis, Minnesota

Dear Sir:

I have received your letter requesting the chest x-rays on Mr. Dennis Cleary taken in February and March of this year. These x-rays are in the possession of St. Andrew's Hospital and Dr. John T. Kelly, 1229 N.E. 2nd St. Minneapolis, Minnesota.

None of the x-rays were taken in our office nor do we have possession of any of them.

Sincerely yours,

John E. Middlebrook, M.D.

JEM;lb
