Stu, Lauren and Sarah,

I am concerned with some of the comments in the attached papers. An example below. I was not aware that the project was taking on the "treatment". Also, the "research of leukemia and lymphoma in China" bothers me because I thought that we were looking at benzene induced disease in Shanghai. Don't know what to do except raise the questions. The papers make me feel like the project is even bigger than my understanding.

Joint Sino-US Clinical & Molecular Laboratory (JCML), which has been invested nearly 3 million US dollars by both China and USA, was established today. The lab will greatly promote the levels of diagnoses, treatment and research of leukemia and lymphoma in China.

Regards,
Patsy

Susan:

For your information. Note the consortium sponsors are not mentioned - consistent with what we heard from Henry Wang.

The consortium held a conference call yesterday regarding outreach to the scientific and regulatory communities and the consortium technical committee now has the lead to move things forward. This will involve the compilation of names of individuals and institutions (such as the EPA, OSHA, NIOSH, Leukemia Society, American Cancer Society) who would have an interest in the study, seek concurrence from the oversight committee and then make formal contact via phone, email and possibly an open meeting. This is a reasonable beginning for the consortium, with the expectation of expanding the list of interested parties as we gain experience and confidence in the process.

It is my understanding that a Shell plan will build on the consortium plan.

Stuart

BHRC Committee Members:

The message below is from Dr. Irons concerning the JCML launch event. The attached documents are three translated articles about the event, the agenda, and Dr. Irons comments during the event.

Best regards,
Matt

Attached are translations of newspaper clips that appeared in the Shanghai Press concerning the Inaugural, along with a copy of the agenda and my inaugural comments. We also have an official description of the laboratory and the projects that is being translated into English, that I will get to you. I will also try (emphasis added) to include for you a web site address for a Fudan news release.
