CONTROL: WO-53222-R & WO-53224R

1. Separate work orders will be issued for the removal of asbestos-containing insulation.
2. The numbers for these orders will have the suffix letter "R", which is to be entered on the foreman's time sheet.
3. Maintenance Records Center will keep a daily log of personnel assigned to these jobs as determined from the time sheets.
4. Once each month, they will send a list of all personnel assigned to this work to the Medical Department and the Safety Department.
5. A separate tabulation will be made of asbestos removal jobs so that a current list of asbestos insulation locations may be maintained.

RESPONSIBILITY:

1. The Maintenance foreman assigned shall have the responsibility for insuring that the personnel he/she assigns

[illegible]

Medical
Dept.

1. Specific work orders must be written for the handling of asbestos insulation. Even if the work is done in conjunction with another job. The "Y" suffix will be attached to each of these work orders.
2. Upon coding these work orders, the '44' will still be used in the equipment code, but the job type will be "YY". This will give the system a double check to obtain data.
3. MIS will supply a monthly re-cap of activity to be given to the Medical Department for Federal reporting purposes.

If there are any questions or problems, please contact me.

[illegible]

CONTROL:
