Carcinogen Synonym List

The results of our recent request for comments on the subject list were reviewed with J. R. Gibson, Director of Health & Safety, and with the Product Environmental Committee. It was decided that in the future (1) the list will be updated annually rather than quarterly, (2) supplements to the list will be issued as needed, (3) the Du Pont Carcinogen Classifications would be dropped, and (4) the terms will be merged into a single alphabetized list. The indicated changes are reflected in the attached (January 1981) "Carcinogen Synonym List".
