DANA CORPORATION

INTRA-COMPANY COMMUNICATION

SUBJECT Nonasbestos Meeting - March 29, 1988 DATE March 30, 1988

TO

Gretna Morgan	Bernice Puskaric	Dean Lewis
Phil Mark	Jeff Ruzich	Bill Gehren
Carolyn Puff	Gary Austin	Pat Repp
Marolyn Watson	Sandi Throne	

June 1 is the deadline for running asbestos parts unless Chicago has material in process. There are approximately 1200 numbers involved. New analysis cards are now being processed.

There are a few Chicago part numbers that will be run in Canada and Mexico on a permanent basis. These will remain asbestos for a time. Busco will be notified of list at later date.

Chicago is changing internally on a temporary basis from a plain part number to an "A" prefix, an "I" number will change to "J" and "RD" number to "SD". They will change back when all asbestos is out of their system. Gary Austin has a list of all part numbers to be changed.

Phil Mark suggested changing color of nonasbestos material to black and painting the edge of the gasket a bright color so anyone can readily identify every part number that is nonasbestos. All asbestos must be removed from our system at earliest possible date. Busco people must be advised of urgency of this matter.

New cost will be available within four to six weeks.

Chicago to furnish Busco with new material identification along with list of part numbers involved with each. Chicago states they will send people to Busco to help identify asbestos product. Early April, Victor Division will begin identifying asbestos product with a warning label.

Thursday, March 31 there will be a Victor Nonasbestos Task Force Meeting held in Lisle.
