TO: ALL OUR BONDEX CUSTOMERS

RE: BAN ON ASBESTOS CONTAINING WALL PATCHING COMPOUNDS

This is the second notice being mailed to our Bondex Customers on the above referenced ban which has been placed in effect by the Consumer Product Safety Commission.

In summary, after June 11, 1978, distributors and retailers will be prohibited from selling, offering for sale, or distributing any of the above mentioned materials no matter when manufactured or initially introduced into Commerce, to distributors, retailers, consumers, or to others for application in consumer environment.

In all likelihood, Bondex distributors and dealers will, for the most part, have sold all asbestos-containing wall patching compounds presently in stock before the June 11th deadline. Nevertheless, because of the possibility of improper stock rotation, or slow movement, we are again writing to call your attention to this deadline. For all practical purposes, any Bondex Wall Patching Compounds in stock at the time of our first letter of February 15, 1978, should be sold prior to the June 11th deadline so there will be no difficulty with any improper materials remaining.

Don't delay, check now and rotate your stock to avoid having any unsaleable merchandise in stock on the ban date. There is still ample time to clear your stocks now.

Sincerely yours,

BONDEX INTERNATIONAL, INC.
