AIR

Ambient Air Monitoring Network Plan California Regions AIR

Notice of the San Luis Obispo County Air Pollution Control District announces the draft 2017 Ambient Air Monitoring Network Plan (ANP), which is intended fulfill federal requirements for state or local agencies to submit to the EPA annual monitoring network plans to document the establishment and maintenance of air quality surveillance systems (40 CFR 58.10). The current plan describes the region's existing network and reports that aside from some temporary closures, there have been no significant changes to the network since the last ANP and no future changes are planned. Comments are due June 26, 2017. Contact: Karl Tupper; San Luis Obispo County APCD; 805-781-5912; ktupper@co.slo.ca.us

Regulatory Update

AIR

Equipment Not Requiring a Written Permit California Regions AIR

Final rule of the South Coast Air Quality Management District amends regulations under Rules 219 and 222 concerning equipment not requiring a written permit. The rule adds exemptions for a number of equipment categories with small criteria pollutant and low toxic emission profiles and limited potential for further reductions from permitting requirements. The rule also revises filing requirements for operators of certain types of permit-exempt equipment. The rule is effective May 5, 2017. WATER

New River/Raw Sewage from Mexicali
California Regions WATER

Notice of the Colorado River Basin Regional Water Quality Control Board announces a resolution (R7-2017-0022) requesting that the federal government and the North American Development Bank and Border Environment Cooperation Commission take action to ensure Mexico eliminates bypasses of raw sewage from the Mexicali area into the New River. The resolution was adopted May 19, 2017. Contact: Jose Angel; Colorado River Basin RWQCB; 760-346-7491; Jose.Angel@waterboards.ca.gov

Regulatory Update

WATER

Sacramento and San Joaquin River, Tulare Lake Basin Water Quality Control Plans
California Regions WATER

Notice of the Central Valley Regional Water Quality Control Board announces the rescheduling of a hearing on a proposed amendment to the water quality control plans for the Sacramento and San Joaquin river basins and the Tulare Lake Basin to establish a region-wide process for evaluating the municipal and domestic supply beneficial use in agriculturally dominated surface water bodies. The amendment establishes a water body categorization framework to distinguish between water bodies that have been constructed or modified to convey agricultural drainage or agricultural supply water, natural water bodies dominated by agricultural operations, and water bodies encompassed in a permanent or seasonally closed controlled recirculating basin. The amendment also establishes a limited municipal and domestic supply use for agriculturally dominated water bodies that do not meet the sources of drinking water policy exceptions but that have inherent limiting conditions, such as low or intermittent flows and/or elevated natural background constituent concentrations. The hearing date change is needed so the board can consider nonsubstantive revisions related to consistency between the proposed amendment and the board's Irrigated Lands Regulatory Program. The hearing now is scheduled for Aug. 10-11, 2017, in Rancho Cordova. Contact: Anne Littlejohn; Central Valley RWQCB; 916-464-4840; anne.littlejohn@waterboards.ca.gov

Colorado

WATER

Aquatic Life Use Attainment Policy
Colorado WATER

Notice of the Department of Public Health and Environment, Water Quality Control Commission,

announces a hearing to consider revisions to the aquatic life use attainment policy (Policy 10-1). The current policy, which expires Aug. 31, 2017, provides the commission's methodology for determining whether the aquatic life use is attained in rivers and streams and relies on direct measurement of aquatic life use rather than on comparing existing water quality to numeric standards for individual pollutants set to protect aquatic life. The hearing is scheduled for Aug. 7, 2017, in Denver. Comments are due June 30, 2017. Contact: DPHE, Water Quality Control Commission; 303-692-3500

WATER

Consumptive Use of Water Right Calculations

Kansas WATER

Proposed rule of the Department of Agriculture, Division of Water Resources, amends regulations under KAR 5-5-9, -5-10, -5-16 and -14-11 regarding consumptive water usage. The rule modifies how the consumptive use of a water right is calculated when converting an irrigation water right to a different beneficial use made of water. The rule also adds an additional well water right and modifies how the civil penalty on a delinquent water use report will be applied based on when the report and penalty are received by the department. A hearing is scheduled for July 25, 2017, in Manhattan and via teleconference in specified locations. Comments are due July 25, 2017. Contact: Ronda Hutton; Department of Agriculture, Division of Water Resources; 785-564-6715; ronda.hutton@ks.gov
