Attached is a copy of Bill Maddox's November 29, 1972 memo which formalizes the transfer of control for PCB fluid returns to his office effective December 1, 1972.

Since the project files will stay with the Product Group (D. E. Roush), questions relating to returns and return notices issued prior to December 1 may best be directed to my old phone number 4-2514. The secretary will be on hand Monday through Wednesday for the next few weeks to search through the files in answer to "return" questions. It is hoped that this action will aid both you and Bill Maddox during the next few weeks.
