

For all Farm Buildings LEAD PAINT

FOR painting the house and other farm buildings—inside and out . . . for all surfaces—wood, plaster, metal, concrete, brick, and stone—use pure lead paint, made with Dutch Boy white-lead. It provides sure protection for exteriors . . . beauty for interiors.

Here is the same durable white-lead paint that has been standard for so long on farms everywhere . . . the same reliable paint that master painters everywhere use for their best jobs. Such paint does not crack or scale. It wears . . . and wears . . . and wears.

You can now get Dutch Boy white-lead in a new form—as a soft paste which can be made ready for the brush in a few minutes. Saves time and labor.

Write our nearest office for the helpful "Handbook on Painting," 125 pages. Tells how to paint farm property and equipment.
