7. How many hospital beds available. 6

8. How many beds available for T.B. None

9. (a) Number of physicians in general practice 3

(b) Number of nurses in private duty practice. None

(c) Any other general medical service available to population.

None

10. In what respects, if any, do you think living conditions of the working population are defective.

None Living conditions good

This form was turned in by an agent not by a nurse
I am a little dubious about the information
If there are 6 beds available I should think there would be
a plant nurse & at least a part time doctor
