

September 29, 1941

Mr. George Detweiler,
3518 Lewis Tower Building,
Fifteenth and Locusts Streets,
Philadelphia, Pennsylvania.

Dear Mr. Detweiler:

Pursuant to our telephone conversation of this morning, I am sending you under separate cover a book into which are bound a series of articles from this Laboratory, which I think will be of interest to you in connection with your case. I put slips of paper in the book to mark certain articles which will be of particular interest.

I am sending several more recent articles which may also be of interest to you. All of the articles contain references to the work of other experimentalists in this field.

Let me warn you at this time that the book which I am sending you must not be made an exhibit, and so a part of the record in this case. In fact, these books are now out of print, and I can only lend you this one for your immediate use.

I would appreciate it if you would let me know as early as possible the approximate date on which I shall have to appear in connection with this case, since my engagements are fairly numerous at this season of the year. Incidentally, I expect to be in Atlantic City on the week of October 13, at a scientific meeting. If it would serve any useful purpose, I could call on you some time during that week and discuss such phases of the case as you may wish to bring up.

Very truly yours,

Robert A. Kehoe, M. D.
