**Subject:** Your Gmail address, **Ex. 6 Personal Privacy (PP)** has been created

**Welcome to Gmail!** You can login to your account at <https://mail.google.com/>.

Here are a couple of tips to help you get started:

- **Use Gmail's import tools** to move mail and contacts from your other email accounts to your new Gmail address.
- **Download the mobile app** for Android or iPhone and iPad to stay connected on the go.

Should you ever encounter problems with your account or forget your password we will contact you at this address.

Enjoy!

The Gmail Team

## Google Verification Code

Dear Google User,

This email address is being used to recover a Google Account. If you initiated the recovery process, it is asking you to enter the numeric verification code that appears below.

If you did not initiate an account recovery process and have a Google Account associated with this email address, it is possible that someone else is trying to access your account. *Do not forward or give this code to anyone.* Please visit your account's [sign-in & security settings](#) to ensure your account is safe.

**Ex. 6 Personal Privacy (PP)**

Sincerely,  
The Google Accounts Team

**To:** Ex. 6 Personal Privacy (PP)  
**Subject:** Moving On  
**Attachments:** Chris Tomassi

Hi All – After slightly more than 15 years, today marks my last day in the Senate. It has been an honor and a privilege to work in the Senate and specifically for Chairman Shelby, Chairman Murkowski, and former-Chairman Cochran on the Appropriations Committee. And, before my current role, to work for Senator Enzi and for the EPW Committee. I have made some great friends and learned so much over the past 15 years and appreciate all the opportunities the Senate has provided.

I am not going far as I am headed to the ClearPath Foundation (<https://clearpath.org/>). I have attached my contact info and it is pasted below.

If you need immediate assistance on the Appropriations Committee, please contact Leif Fannesbeck at [leif\\_fannesbeck@appro.senate.gov](mailto:leif_fannesbeck@appro.senate.gov).

Thanks to all of you for your work and friendship over the years. I hope we can stay in touch.

Best,  
Chris

Closest Metro Station - Federal Triangle Metro on the Orange/Blue/Silver lines

**Our Address:**

William J. Clinton Building West  
1301 Constitution Ave, NW  
(On Constitution between 14th and 13th across from the National Museum of American History)

**Current Status of States/Territories**

The Department of Homeland Security (DHS) announced on December 20, 2013 a phased enforcement plan for the REAL ID Act (the Act), as passed by Congress, that will implement the Act in a measured, fair, and responsible way.

**Noncompliant States/Territories without Extensions**

- Am.Samoa
- Illinois
- Minnesota+
- Missouri
- New Mexico
- Washington+

+ Federal officials may continue to accept Enhanced Driver's Licenses from these states.

**Compliant/Extension States/Territories**

The following states/territories are compliant with the REAL ID Act:

- Alabama
- Colorado

- Connecticut
- Delaware
- DC
- Florida
- Georgia
- Hawaii
- Indiana
- Iowa
- Kansas
- Maryland
- Mississippi
- Nebraska
- Nevada
- Ohio
- S. Dakota
- Tennessee
- Utah
- Vermont
- West Virginia
- Wisconsin
- Wyoming

The following states/territories have an extension, allowing Federal agencies to accept driver's licenses from these states until October 10, 2016:

- Alaska
- Arizona
- Arkansas
- California
- Guam
- Idaho
- Kentucky
- Louisiana
- Maine
- Massachusetts
- Michigan
- Montana
- New Jersey
- New York
- N. Carolina
- N. Dakota
- Oklahoma
- Oregon
- Pennsylvania
- Puerto Rico
- Rhode Island
- S. Carolina
- Texas
- Virginia

The following states/territories have an extension, allowing Federal agencies to accept driver's licenses from these states, until June 1, 2016.

- New Hampshire

The following states/territories are under review for an extension renewal, allowing Federal agencies to accept driver's licenses from these states, until at least January 10, 2016 under a grace period.

- N. Marianas
- Virgin Islands

Last Published Date: January 26, 2016

**Subject:** Unsolicited Proposal funding?  
**Attachments:** USDA Senator McConnell LOS.pdf; USDA Sen. Capito Letter.pdf; Senator Manchin support letter.pdf; Jenkins LOS.pdf

Hello Holly.

From your bio, I see that you are a UT graduate. Tennessee is a beautiful state!

My daughter recently moved to Franklin, Tennessee, where she works with Dave Ramsey.

Bettering Bell has unique economical coal ash technology that will **protect the environment; Protect workers; Protect employers; Protect utility; Providing much needs jobs in Appalachia; While saving electric power ratepayers' money.**

In our efforts, we applied for a USDA Solid Waste Management grant.

Attached are **bi-partisan Letters of Support** from Senator Mitch McConnell, Senator Joe Manchin, Senator Shelly Capito and Representative Evan Jenkins.

Each sees the merits of our efforts.

It was suggested that we also reach out to the EPA.

**Does the EPA Administration have \$750,000 available to fund a very worthwhile project through an Unsolicited Proposal?**

If you have any questions, please do hesitate to reach out.

Respectfully.

*Charles*

**Subject:** Swearing-in Ceremony of Francis R. Fannon - Reception Instructions

## We look forward to seeing you for the Swearing-in Ceremony of Francis R. Fannon

### July 18, 2018 at The Department of State

Please arrive to the Department of State, Harry S Truman building (2201 C Street NW) **no later than 3:20 pm** to go through security and check in.

The ceremony will be from 4:00 pm – 4:30 pm in the 8th floor diplomatic reception room. Escorts will greet you upon arrival.

**A/S Fannon would like to invite you to a small gathering in his office space following the ceremony starting at 5:00pm. You will receive a blue badge when you arrive at registration so escorts will be able to identify you post ceremony. Please look for Melissa Simpson at 4:45pm to head downstairs to suite 4428.**

**Subject:** RE: Meeting in Arizona - June 13, 2018

Hi everyone, I am working on planning the lunch for next week's IOI meeting on June 13<sup>th</sup> from 12:00-4:00 pm at ADEQ. I need to confirm how many people are attending, so that I know how much food to order. So far, I have the draft list of attendees below. Can you please let me know who I am missing, so that I can get an accurate count? Also, please bring \$10 cash to pay for your lunch. We will have a variety of sandwiches (to include vegetarian), chips, and drinks for lunch. However, please let me know if you have any special dietary requests. Also, I am here to help with any travel arrangements, so please reach out to me if you need anything. I look forward to seeing you all next week. Thank you, Tara Ousley

- Ken Wagner, Sr. Advisor for Regional and State Affairs, EPA HQ
- Jonathan Brightbill, Deputy Assistant AG, US Department of Justice
- Mike Stoker, Administrator, EPA Region 9
- Tomas Torres, Water Division Director, EPA Region 9
- Hector Aguirre, Director San Diego Border Office, EPA Region 9
- Trish Incognito, Executive Director, Water Infrastructure Finance Authority of Arizona (WIFA)
- Misael Cabrera, Director, ADEQ
- Bret Parke, Deputy Director of Operations, ADEQ
- Trevor Baggione, Water Quality Division Director, ADEQ
- Amanda Stone, Chief Policy and Legislative Affairs Officer, ADEQ
- Edna Mendoza, Border Environmental Manager, ADEQ
- Hans Huth, Environmental Associate Hydrogeologist, ADEQ

Thank you,

**Tara Ousley**

Executive Assistant to Director Misael Cabrera, P.E.

**Subject:** RE: Meeting in Arizona - June 13, 2018

*Sorry for another email, but due to the large group, instead of taking individual lunch orders, we will just have a variety of sandwiches (to include Vegetarian), chips, and drinks for lunch. However, please let me know if you have any special dietary requests. Thank you, Tara*

Thank you so much for the email confirming our upcoming meeting on Wednesday, June 13, 2018, 12:00 – 4:00 p.m., that includes a working lunch. Below is a list of participants that will be attending the meeting from WIFA and ADEQ, please reply back with your list of attendees, titles, and email addresses for our logistical conference room planning. I have attached a list of hotels near our office and I am happy to work with your assistants to help them with your travel arrangements. We are looking forward to the meeting and please feel free to reach out to me for any assistance. Thank you, Tara Ousley

- Trish Incognito, Executive Director, Water Infrastructure Finance Authority of Arizona (WIFA)
- Misael Cabrera, Director, ADEQ

**Subject:** Meeting in Arizona - June 13, 2018

All:

This email is in anticipation of our June 13, 2018 meeting between Arizona Department of Environmental Quality (ADEQ), US Department of Justice (DOJ), and US Environmental Protection Agency (EPA) to be held from 12:00pm to 4:00pm in the Phoenix office of the ADEQ. We will plan on eating lunch together (menu to be circulated) to visit as we set the tone for what, we all hope, will be a productive meeting around the issues and potential solutions for the International Outfall Interceptor (IOI). A few general ground rules before we start; Most importantly, we need to recognize that this is not part of the formal litigation process and, while the solutions discussed may have an impact, it is not intended to settle the litigation. With this in mind, we ask concurrence with the following:

1. While this is not a formal mediation, we all agree that the discussions held, statements made, documents used or agreements reached shall not be admissible in court for any reason in the current Litigation between the United States (IBWC) and the State of Arizona (Litigation). This requirement will encourage frank and open discussion about how to fix the problems without fear of prejudicing anyone's legal position in the Litigation.
2. We need to focus on solutions rather than the merits (or weakness) of either side's case in the Litigation. We need to reinforce and encourage creative solutions to funding improvements of the IOI, including all federal, state, local and foreign investment possibilities, while openly and honestly discussing the impediments or challenges to implementing these solutions.
3. ADEQ will have available its sister agency (WIFA) available to join to talk about state revolving funds for clean water infrastructure.

4. EPA will have Office of Water Finance; Office of International & Tribal Affairs and other potential program stakeholders available.
5. Please circulate a list of attendees from your respective agency.

Again, we are looking forward to a positive and productive meeting with parties who all have a significant stake in seeing the success of the water treatment for Arizona through the IOI. Please review the forgoing and let us know if there are additional points for agreement and, if agreeable, indicate your concurrence with these points for the meeting.

Let me know if you have any further questions.

Ken

**Attachments** [Agenda RESTORE Council Federal Members Meeting.docx](#)

Directions: If you come by Metro, the Federal Triangle metro stop is directly below the building entrances. You would leave the metro station and go up all three sets of escalators from the train otherwise two escalators then do a small U-Turn to the left heading toward 12th street, the South Lobby entrance is directly and immediately to your right (Glass Doors -EPA Signified on Glass).

EPA address is 1200 Pennsylvania Avenue, NW. If you are coming by taxi/vehicle, you want to be dropped off on 12th Street NW, between Pennsylvania and Constitution Avenue. It is almost exactly half way between the two avenues on with Federal Triangle Metro sign and Trump Hotel Towers across street is a landmark. From 12th Street, facing the building with the EPA and American flags, walk toward the building (under the flags) Please enter the North Building.

Once inside the building, security will prompt you to scan all items such as bags, coats etc., and then let the guards know that you were instructed to call Latonia Cheatham Strickland at 202-564-7930.

**Subject:** Invitation to Business Roundtable Meeting  
**Attachments:** attachment 1.pdf

Hello Andrew,

I'm not sure if you'd remember me, but we met a few times during my tenure with Sen. Alexander when you were leading the EPW Committee Staff. Congratulations on your recent Senate confirmation.

Attached please find an invitation from the CEO of International Paper, Mark Sutton, to speak to Business Roundtable's CEO Committee on Energy & Environment on the morning of Wednesday, June 6. You should have received this invitation already by way of Administrator Pruitt's staff, but I wanted to send a copy directly to you just in case.

Please, let me know if you have any questions. We hope you can join the CEOs on June 6.

Sincerely,

**Matt Sonnesyn** | Vice President, Energy & Environment Policy | Business Roundtable  
300 New Jersey Avenue, NW | Suite 800 | Washington, DC 20001

**Subject:** Meeting request

Hi Andy,

I hope you are settling in as Deputy Administrator.

I'm hoping you can help me out on a meeting request with Bill Wehrum. I sent him a meeting request but I don't know him so it may have gone into his spam file.

I'm wondering if you can forward my request.

I represent Ceres - an organization of corporations and investors concerned about the impact changes in weather and climate are having on the economy. Ceres member companies will be in Washington, DC on June 4-5 and would like to talk to you about proposed changes to the vehicle emissions standards. Companies who would join the meeting include:

Mark Bescher, Unilever  
Tess Hetzel, Symantec Corp  
Ken Locklin, Impax Asset Management  
Kristina Friedman, Stu Dalheim, Calvert  
Amy Pressler, Southern CA Edison  
Rohan Patel, Tesla  
John Chaimanis, Kendall Investments  
Brian Rice, CalSTRS  
Michael Garland, NYC Assistant Comptroller

Please let me know if I can provide additional information.

Cliff

**Subject:** Following up

Hi Andrew,

It was good to see you last Wednesday at the meeting with IPC member electronics industry executives. I am putting together a package of information about the TSCA and other EPA issues of interest to IPC and the electronics industry. I should have something to you in a day or so.

I also wanted to follow up on the emails I sent to you earlier about scheduling a meeting with you for the founder and CEO of Clean Harbors. I had not heard back from you and raised this issue with John Konkus over coffee a couple of weeks ago. John is an old friend from when we both worked together on the Hill back in the 90s. My note to him following up on our discussion is below which you may have already seen from John.

As I mentioned to John, the purpose of the meeting request with you was to introduce you to and the senior EPA leadership to Clean Harbors and their issues but also to see if we could schedule a site visit to one of their facilities. I outlined some options for such a visit for either you or Administrator Pruitt as summarized below. I emphasized that this is a positive environmental and jobs message and shows strong cooperation between EPA and industry. Let me know what you think.

Best wished in your important role at the agency.

Gabe

**Subject:** Clean Harbors Meeting-Site Visit Request

Dear John,

I am following up on our conversation about trying to schedule a meeting or site visit between EPA senior leadership and [Alan McKim](#), the Founder and CEO of Clean Harbors, which is the largest environmental services company in the US. Some background on the company is found [here](#) and covers both their environmental service work and their recycling of used oil and solvents through their Safety-Kleen subsidiary.

As I mentioned they were formed to help with the cleanup of Boston Harbor. They have been involved in virtually every major US environmental cleanup project over the past 35 years. This includes the Exxon Valdez and Gulf oil spills and numerous national hurricane and disaster relief efforts. They provide cost effective environmental services to the EPA, the Department of Defense, FEMA and other Federal agencies and almost all of the Fortune 500 companies.

As I mentioned, we have a meeting request pending with Andy Wheeler but our goal is ultimately a site visit where we can highlight the positive economic and environmental message of doing good by doing well. Two possible meeting venues are:

- Safety-Kleen's East Chicago, used oil refinery in Northwest Indiana, the largest such facility in the world, where dirty used oil is refined into high quality lubricants that have gone into US Humvees and Indy race cars.
- Clean Harbor's Lone Mountain RCRA permitted Hazardous Waste Landfill, in Northwest Oklahoma, which is one of the largest RCRA landfills in the country, including a review of the mile long rail transfer facility constructed specifically to handle the 3 million cubic yards of PCB contaminated dredged material from the Hudson River and Hudson Falls Superfund sites processed at the facility in a cost effective and environmentally safe manner.

As I mentioned, they have had an excellent working relationship with various offices and regions, including work done recently with Patrick Davis and the career staff within OLEM and the CSPP, as well as with Susan Bodine when she served as AA for the predecessor arm of EPA that housed Superfund and RCRA programs. We would be happy to work with you on dates that might be best for Alan McKim and you all as well. Let me know if you need a more formal letter and whom else I may need to reach out to on this. You had mentioned someone I think in OLEM (Steve??) whom I might want to also connect with and I failed to jot down the name so let me know.

Best,

Gabe

**Subject:** Meeting Request

Good afternoon, Mr. Wheeler –

I am following up on a message I left on your voicemail earlier in the week regarding a meeting for Paul Noe of American Forest and Paper and Marc Himmelstein from National Environmental Strategies.

Would you have some time in the next week or two to discuss Washington State Water Quality Standards?

Your assistant can reach me by email or at the number below to discuss scheduling, or if you need further information.

Thank you for your time.

Madonna Mitchell

**Subject:** Offshore Oil Drilling in America

Dear Andrew Wheeler,

My name is Ex. 6 Personal Privacy (PP). I am Ex. 6 Personal Privacy (PP) old and go to Ex. 6 Personal Privacy (PP) School in Norman Oklahoma. I oppose offshore oil drilling and here is why. We spend billions of dollars on things that hurt the earth, hurt the ecosystems, hurt the animals, and even hurt us. Oil wont even exist at one point and will run out. So that means were spending billions of dollars on a recourse that wont even be here one day. You could be spending that money on trying to find renewable energy that is better and cleaner than oil.

When we continue to spend money on these things all we're doing is putting our selfs in a deeper hole that we may not be able to get out of. Instead of spending billions of dollars on something that can hurt the earth, why don't we spend that on ways to fix what we've done to the earth instead of making it worse. Think about what we could do if we used that money on finding renewable recourses and creating a better environment for generations to come. I know that offshore oil drilling does have benefits or President Trumps Amenistration would not be proposing it, but make sure that you are completely aware and informed of the consequences that may come with it.

As a United States citizen I am using my right to voice my opinion and I hope that you take it into consideration.

# Republicans must return to their conservation roots

by Andy Sabin

| July 01, 2018 08:20 AM

Environmental protection is a great American success story.

*(AP Photo/Anna Johnson)*

*Ads by Revcontent*

The nation's economy is humming along nicely with unemployment at an all-time low. Now President Trump and Congress must unite for a clean and healthy environment, and Republicans must reclaim leadership on this critical issue.

Republicans have rightfully opposed misguided policies such as President Obama's Clean

Power Plan and the Waters of the United States rule. But for far too long, we have done little to proactively shape policy solutions, leaving a vacuum that liberal interest groups have filled with big-government solutions.

It's high time the party of Teddy Roosevelt reclaims the environment, redefines the narrative, and leverages good old-fashioned American know-how and innovation. As Roosevelt once said, "Conservation is a great moral issue, for it involves the patriotic duty of insuring the safety and continuance of the nation."

Environmental protection is a great American success story. The quality of our environment affects every aspect of our economy, health, and quality of life. Thanks, in large measure, to conservative leaders, including Richard Nixon, who established the U.S. Environmental Protection Agency and signed into law the federal clean air and water acts, we are a healthier and more prosperous nation.

We can afford a clean environment because of a robust economy. Moreover, our energy companies, increasingly focused on cleaner energy, are poised to lead the world, creating even more American jobs.

Yet despite our environmental gains over the last 45 years, we still have a long way to go.

Environmental pollution continues to harm America's working families and communities. For example, air pollution alone causes 200,000 early deaths each year in the U.S. Children and those living in socioeconomically distressed communities continue to be disproportionately harmed by air and water pollution. Consider the tragedy in Flint, Mich., where 100,000 people were unwittingly poisoned by lead in their drinking

water. As well, many of our nation's water bodies such as the Chesapeake Bay, the Great Lakes, and Gulf of Mexico continue to be impaired due to excess pollution, imposing enormous costs on communities, businesses, and the public health. And there are over 1,300 endangered or threatened species in the U.S listed under the Endangered Species Act and hundreds more are awaiting review.

While many, including myself, applaud the president's decisive actions to reform federal agencies and roll back bad regulations, a caution is in order. We can't afford to gut national safeguards to protect public health and the environment. The American public cares deeply about clean air, clean water, and our public lands.

To be great again means that our air and water are safe and clean, our streams and lakes are swimmable and fishable, our oceans are free from toxic plastic pollution, our public lands are properly maintained and accessible to all, and our natural resources are managed according to the best available science.

My party must return to its conservation roots. It is our moral and patriotic duty.

We can start to by passing important bipartisan legislation. The first, sponsored by Sens. Richard Burr, R-N.C., and Maria Cantwell, D-Wash., would permanently authorize the Land and Water Conservation Fund, one of the most important programs for protecting federal public lands and waters, including national parks, forests, and wildlife refuges.

Another bill, the WILD (Wildlife Innovation and Longevity Driver) Act, co-sponsored by Sens. John Barrasso, R-Wyo., and Tom Carper, D-Del., would promote wildlife conservation, fight against invasive species, and protect threatened species using U.S. technology and innovation. The National Park Restoration Act, sponsored by Sen. Lamar Alexander, R-Tenn., would help reduce the growing maintenance backlog that has long plagued our national parks. And lastly, the Recovering America's Wildlife Act, sponsored by Rep. Jeff Fortenberry, R-Neb., would help proactively protect species from endangerment and being placed on the ESA list.

America is at its best when we recognize and attack common challenges. Let's put aside partisan politics and make our great outdoors great again.

*Andy Sabin, a lifelong Republican, is the Chairman and President of Sabin Metal Corporation and founder of the Andrew Sabin Family Foundation, which funds global research and conservation to protect imperiled species and their habitat, environmental scholarships, and cancer research.*

**Subject:** Congratulations Mr. Wheeler.

Dear Mr. Wheeler - I am enthused to see from your resume that you were an Eagle Scout, and have played an important role in protecting our economy. I hope this means that you will return the EPA to its original purpose of protecting the environment and people's lives and health. The future of the American landscape is in your hands. Climate change is not a theory, it is real, and the majority of the world's scientists and world leaders are in support of doing everything possible to lessen its cataclysmic effects. Pollution costs lives and livelihoods. Mr. Pruitt unfortunately believed none of this and was hell bent to destroy the EPA, and our environment. Don't let our children and grandchildren down. Do the right thing and put our environment first, and the oligarchs last. We are counting on you. Your era may well extend into the next presidency, which I think will not be that far off, and a new plan for our environment will serve you well to succeed.

regards and best wishes.

Robert D Freeman  
North Bend, WA

"Mr. Wheeler served in a similar capacity for six years for the Subcommittee on Clean Air, Climate Change, Wetlands and Nuclear Safety. He started his career at the Environmental Protection Agency as a Special Assistant in the Pollution Prevention and Toxics office, where he received three bronze medals."

**Subject:** Region 5 USFS, WUI Goat Grazing,

Thank you Erin,

Background: We graze goats on contact for PG&E, Union Pacific, City's and HOA's to help reduce the threat of out of control fire in and around homes, subdivisions and critical utilities caused by the over growth of brush.

I have been trying to get the USFS, Region 5 to develop projects along their WUI's to help them maintain fire free zones so we do not get fires, like Santa Barbara, Napa or Santa Rosa where we have loss of life and property.

In addition to the contracting portion of our business we raise these goats for meat production and in doing so we need to have access to goat grazing allotments as of now there are none on region 5.

We are meet with the NEPA, Budget and Staff excuse over and over again.

I need a streamlined process to help get Goats and sheep back into the USFS and BLM properties to help in the reduction of fire fuels that destroy these properties and SAP our financial resources.

PLEASE I NEED YOUR HELP!!

I look forward to your help in moving these types of projects forward.

Please copy me on any emails and contact persons in other agencies that may help me in the pursuit of these types of fire mitigation projects.

Let Us Help You  
Be The Solution

Now EPA must fine Bloom \$100 million not \$1 million

## THIS IS THE YEAR OF THE BLOOMERANG

On Thu, Jul 5, 2018 at 12:48 PM, Lindsay Leveen <Ex. 6 Personal Privacy (PP)> wrote:

Bloom would be technically out of cash had they not hocked the company back in June 2017 with the issuance of \$100 million of 10% Notes to "certain accredited individuals and qualified institutional buyers".

They even pledged their "administrative fees" from the five power purchase agreements including the fraud under PPA2 in Delaware.

The SEC must require Bloom to disclose who these "certain accredited individuals and qualified institutional buyers" are?

Senator Schumer the Bloomer and other bought senators need to tell us how they were lobbied to reinstate the 30% investment tax credit to the Bloom Dog Gal that was ready to be put down.

Bloom is Solyndra times eight and Flint on Steroids. I do not give a hoot that John Doerr and his friends are accredited or not accredited. In a world here GREEN LIES MATTER the Bloomdogglers are as low as one can go.

**Subject:** Dissolve EPA-UN Climate Change MOU of 9/16/16

Dear Secretary Pruitt,

Is the EPA leadership aware that a 9/16/16 Memo of Understanding between the EPA and the UN is still in effect and could be a vehicle for regulators to continue disastrous climate policies? Besides the prudent steps taken to exit the UN Paris Climate Accord, the US EPA should also dissolve the MOU so that "deep state" regulators will have no other basis for surreptitiously implementing their radical climate agenda.

Thank you for the attention, and keep up the good work.

Steve Weismantel

**Subject:** Congratulations and Meeting Request

Andy,

I wanted to extend my heartiest congratulations on your confirmation and wish you the best in your important work. I am certain we will have opportunities to work together on several issues going forward.

One such opportunity is a meeting I hope you can take with my client, Alan McKim the Chairman, President and CEO of [Clean Harbors](#), the largest environmental services company in the U.S. Clean Harbors, as you know has been a partner in some of the highest profile environmental remediation projects in the U.S. from the cleanup of Boston Harbor to the Gulf Oil spill. Alan is the founder of the company and his bio can be found [here](#). He can be in DC on May 30<sup>th</sup> or 31<sup>st</sup> or on June 13<sup>th</sup>. I think you know some of the people at the company, including Phil Retallick who served as the Environmental Secretary for Delaware when Mike Castle was Governor. Phil and other senior leaders of the company would be accompanying Mr. McKim.

We hope to cover a range of issues related to their work on environmental cleanup and recycling. One topic would be their support for bipartisan, bicameral legislation which has already passed in the House (HR 1733) calling for a DOE/EPA restudy of recycling opportunities for used motor oil and the development of policy options to encourage more collection and reuse. An identical bill has also been introduced in the Senate (S. 1089). An earlier study found significant energy and environmental benefits from recycling this valuable resource but failed to lay out any significant policy options. We hope to update the study and to discuss options for doing more.

Please let me know if you have time to meet on any of those days.

Gabe

Andrew –

Following up on my telephone message, I called to see if you may be interested and available to speak at the Annual Meeting of the American College of Environmental Lawyers to be held on October 4-6, 2018 at the Jackson Lake Lodge in the Grand Teton National Park. We tentatively would have you speak on Friday, October 5, but are flexible to accommodate your schedule. Having enjoyed presenting with you on panels at the Clean Air Act conferences in D.C. for many years, I know you are a skilled speaker and would love the opportunity to introduce you some of the best environmental lawyers in the nation. Please let me know, and my full contact information is provided below.

Best regards,

Peter

Subject: FYI - Glider Coverage from Cleveland

## **New-looking trucks with old, polluting engines could get a pass from Trump**

By [Stephen Koff, cleveland.com](mailto:Stephen.Koff@cleveland.com)

**WASHINGTON -- Semi trucks with trailers full of potatoes pull out of Sandyland Farms in Howard City, Michigan, on a weekly basis and drive to Ohio, where processors turn the crop into potato chips.**

**To the untrained eye, they're just heavy, over-road trucks like any other on the highway. But to the EPA, the trucking industry and clean air advocates, they represent a new front in the debate over government regulation. And this week happens to be a key week for deciding how and whether trucks like these can continue to be made and sold.**

**Sandyland uses "gliders," or trucks made from old, rebuilt engines and new or repurposed transmissions that are paired with new frames and cabs. Gliders provide a cost-efficient way to salvage old engines, often from a truck that was wrecked. Older engines are simpler and easier to repair because they lack computerized components. The vehicle prices can be 25 percent less than the sticker price of a new one, and taxes on the vehicles are lower, too.**

All,

I wanted to let you know that Fitzgerald had a larger than normal presence at Mid America last week. They have expanded their booth from just Fitzgerald gliders, to now include Fitzgerald Peterbilt (dealership), Fitzgerald Truck Parts, & Fitzgerald Collision & Repair. I've attached several notable pics regarding the gliders.

Additionally, Daimler Gliders also had a booth similar to past years with 3 trucks in it. I have pics of that as well if you're interested.

Please let me know if you have any questions or need anything else.

Thanks!

Sarah--

Copied below is language from the House Appropriation Committee report urging epa to conduct a study of glider kit emissions impacts.

We will start scoping out a test program at the lab regarding what such a test program could look like.

Thanks

Chris

---

*Glider Kits.*—The Committee notes that the Phase 2 rule for Medium and Heavy-Duty Engines and Vehicles is generally supported by the trucking industry. However, under the Phase 2 rule, the Agency defined a glider kit as a new motor vehicle for the purposes of regulation. The Committee recognizes that glider kits typically do not incorporate new engines; therefore, classifying a glider kit as a new motor vehicle raises a number of valid concerns. The Committee

Hi Angela

Looks like we'll be able to provide at least one glider, more if you have time to test. A Volvo test article as well, if you don't already have "modern product" data for comparative purposes.

Two good places to start:

- 1) Test program: UDDS? Chassis dyno operation at RMC points? GHG 55/65/ARB transient?
- 2) Scheduling: Soonest you can test? How long should we plan for each truck to be in Ann Arbor?

I can be available for a discussion before 9, between 10 and 12, and between 2 and 5. (All Eastern times). I'll try to tie in Jeff Marley as well.

Fax: 734-214-4821

• Vehicle types: One "western style", and one more modern acro design.

• Engine types: One "Fitzgerald rebuild" – this is typically a Detroit Diesel, and should have a Fitzgerald ID plate, including Fitzgerald serial number, on the cold side of the engine. The second can be a remanufactured engine, from DD or CAT, but we prefer to stay away from Cummins. One of these engines should be without EGR, and the second with EGR if such a glider exists.

Any combination of the above "specs" is acceptable (doesn't matter which engine in which chassis, ...).

After those two vehicles are tested, EPA spoke about a high mileage unit, so in the range of 400,000 miles or so. But let's hold that request for now and discuss later.

### SCHEDULE

EPA said that ideally they'd like to have the two vehicles simultaneously for 5 weeks, but they recognized that this could be impractical or too costly. If this is too unreasonable to even approach the customer, then let's say the first vehicle for two weeks, and then the second for two weeks on the heels of the first. (I'm sure that 3 weeks each is a better situation for them, so if that's possible...and let's see about cost). EPA is ready to start as early as Sept 18, so as close to that date as reasonable. The trucks should be delivered to their facility in Ann Arbor.

### COST

Please give me an idea of what sort of charges we'll be incurring. This may curtail our ambition somewhat.

Again, what we've outlined is ideal, but we'll take what you can deliver. No problem. Really appreciate the support, and look forward to hearing back from you.

Dear Ex. 6 - Personal Privacy

Steve Berry has indicated that you will be working with us to test a glider.

First, thank you for all of the coordination and willingness to work with us to test the vehicle. We truly appreciate it.

My understanding from Steve is that the vehicle will be delivered to our lab on Monday, October 2. EPA's National Vehicle and Fuel Emissions Lab building is located at 2565 Plymouth Road in Ann Arbor. The building is enclosed by an iron gate. When the vehicle arrives, please pull over to the right and the guards will ask you who you are here to see. Please let them know that you are here to deliver a vehicle for testing and request that they contact Garrett Brown, Maria Peralta, or Connie Hart (in that order). The guards have been notified and will be expecting you. Wait for them to lower the vehicle barrier. Ensure the vehicle barrier has been lowered and the light is green before proceeding. The guards and/or Garrett will then direct you to where to

Hello Erik and Mandy,

It was good to meet with both of you last week during our meeting with Administrator Pruitt.

As I discussed with you post-meeting, Erik, the Volvo Group, Cummins and Navistar legal representatives would like to have an opportunity to meet with you to discuss what we believe to be strong legal arguments that EPA has not only the authority, but the *obligation* to regulate glider vehicles.

We can also discuss business impacts and emissions impacts with respect to gliders, so it would be great if you could be available for the meeting as well, Mandy.

If you agree, we'd like to inquire as to your availability for a meeting in EPA Washington offices on either Oct 12, 13, 15, or 16. Please send us some date/time proposals to consider.

Thanks very much, and we look forward to a productive discussion.

Hi Angela

We'll be meeting with EPA General Counsel Erik Baptist and EPA Senior Policy Advisor for Air and Radiation Mandy Gunasekara on Monday, Oct 16<sup>th</sup> to discuss glider kits. Should you have any preliminary data comparing to "current product" by then, it would be very helpful to have for this meeting.

Also, do you think it would be appropriate for EPA to request a copy of the Tennessee Tech report on gliders, to compare their data to the data you're generating? If yes, we'd be most grateful if to get a copy of that report if EPA can manage to acquire a copy.

Thanks, and have a good weekend!

Steve

Dear Jack and Mike,

I tried to call both of you on Monday, though I did not leave a message.

I wanted to let both of you and the CARB team know that last week on Friday EPA submitted to the Office of Management and Budget for formal interagency review a draft Notice of Proposed Rulemaking. The action is specific to heavy-duty glider vehicles, glider kits, and glider engines.

The action is listed on OMB's web site as being under interagency review – the title is ““Recal of Emission Requirements for Glider Vehicles, Glider Engines, and Glider Kits”

**Subject:** VINs

Hi Angela

Bill C has told me that he's very interested to know VIN practices in the glider world. We're trying to get info from dealers, but while you have these trucks in Ann Arbor, it would be good to look for evidence, huh? VIN# from VIN plate and registration card, ID#'s in door jamb, etc.

Thanks

Steve

Hi Bill,

I was copied on a response you sent to Terry Dotson, the owner of Worldwide Equipment dealer group (with dealerships in KY, OH, SC, TN, WV and VA) on a letter he sent to Administrator Pruitt.

I wanted to be sure you had seen some of the letters also sent with the same message from other dealer groups (copied here) as I am not sure any of these other groups got a response from your office (other than an email acknowledgment of receipt from Erik Baptist).

Some of the letters are attached, and the groups' locations show the pervasiveness of the Glider sales across America:

- [TEC Equipment](#) with dealerships in CA, WA, OR, NV, and AZ...over 1,200 employees
- [Nuss Trucks](#) with dealerships in MN, WI
- [GATR Trucks](#) with dealerships in MN, IA...275 employees
- [RDO Truck Centers](#) with dealerships in NE, ND
- [VoMack Trucks](#) with dealerships in IN, KY and IL...even lists some of the companies they have lost sales to gliders

Thanks, Susan

#### States Fear Air Quality Impacts From EPA Repeal Of 'Glider Kit' GHG Limits

October 30, 2017

States are increasingly urging the Trump EPA to preserve heavy-duty truck greenhouse gas limits for so-called “glider kits,” arguing that administration plans to repeal the limits would lead to a massive increase in nitrogen oxides (NOx) and particulate matter (PM) pollution that could undo efforts to attain air quality standards and require additional controls on other sectors.

As part of their push, a group of state air regulators met Oct. 27 with the White House Office of Management & Budget (OMB) about a draft EPA proposal to “repeal” the GHG limits for gliders, which are trucks sold without powertrains in anticipation of being outfitted with refurbished engines.

Dear Steve,

2 things on this topic.

First, in the past two months we have been able to perform detailed emissions testing on glider vehicles at the Ann Arbor laboratory. I am hopeful we will be able to submit a memo documenting those results into the docket for the Phase 2 rule within a few weeks. That will help shed some light on the subject of the emissions from

Second – we recently had a call with Tennessee Tech to discuss their test program, which was very helpful. I think we will be able to shed more light on that test program within a few weeks and also docket that information for the public.

Thanks

Bill

**Subject:** EPA Notice of Proposed Rulemaking "Repeal of Emission Requirements for Glider Vehicles, Glider Engines, and Glider Kits"

Dear Highway Heavy-duty Stakeholder;

Today EPA Administrator Pruitt signed the Notice of Proposed Rulemaking titled "*Repeal of Emission Requirements for Glider Vehicles, Glider Engines, and Glider Kits*". You can find information regarding this proposed rule at the following website;

<https://www.epa.gov/regulations-emissions-vehicles-and-engines/regulations-greenhouse-gas-emissions-commercial-trucks>

EPA is opening a public comment period on the proposed rule which extends until January 5, 2018. EPA will also hold a public hearing on the proposal on Monday, December 4, 2017.

Information on how to submit public comments, as well as information on the public hearing, are detailed in the proposed rule. A pre-Federal Register publication version of the proposed rule is available at the website listed above.

Matt

A few things on this topic you may find interesting:

- we have finished testing of one Glider in Ann Arbor, and have a s come on the lab right now. I think we will release a test report on both vehicles in the next week to 10 days, once we have

ED\_001620\_00001293

---

finished testing and the test report

- last week I saw a quote that the DTNA CEO has said Daimler will not to backwards, independent of the outcome of EPA's reconsideration rule

- in the last few days, ATA has decided to oppose any change in the Glider regulations established in the Phase 2 rule. I think they may be putting out a statement on that topic

- the ASD team reached out recently to Tennessee Tech. We had a good technical discussion with them, and I think we will be able to document for the record what we have learned, which will explain why the Tennessee Tech results are so different than what we have seen. As you know, emissions testing requires deep skills and experience, and while the Tennessee Tech team is well intentioned, I believe that have a lot to learn. I guess that is good, since they are a university, and learning is part of why you go to college.

I hope all is well with you.

All my best

Bill

Subject: Gliders

Hi Bill,

Thanks for the quick reply. I'm optimistic that EMA as a whole is coming together on this issue too. Jed might have shared with you that we're already drafting comments that we'll eventually share with our members for consensus building, when the time is right.

I read the NPRM today, and I'll be following up with EMA's attorneys here because there are legal arguments in the NPRM that confuse my engineering mind. I don't follow the argument in 3. *Glider kits*. Regardless of what eventually gets installed into a glider kit, the kit would seem new and incomplete on its own, which to me would seem within scope of CAA 202.

I also noted the Agency's NPRM text in 1037.801, "...a new motor vehicle may include previously used parts." I presume that would include previously used engine parts.

Finally, the text under EO 13045 does not seem to take into account and/or build from the HD Phase 2 RTC, Appendix A to Section 14, pp. 1960-1968.

On a separate topic, it was good to see that OAR now has a confirmed AA.

Have a good Veterans Day weekend,

-Matt

**Subject:** SCAQMD Meeting Request -- June 20-21

Hi Andrew:

Can you take a short courtesy meeting on **Wednesday June 20**, or **Thursday, June 21**, with a couple top staff and two Board Members from **South Coast Air Quality Management District (SCAQMD)** who will be in town those days? They had met recently with Bill Wehrum and his OAR group. Interested now to touch base with you.

Group of about 5 people would include:

- Wayne Nastri**, SCAQMD Executive Officer (former EPA Regional Administrator—Region 9 ---under Bush43)
- Judy Mitchell**, SCAQMD Board Member (Dem—Los Angeles County)
- Janice Rutherford**, SCAQMD Board Member (GOP—San Bernardino County)

Topics to include a) Ultra Low NOX standard for heavy trucks; b) General NAAQS implementation stuff; c) Glider rule; and d) CAFÉ

Almost anytime June 20 or June 21 can work for us. Appreciate consideration.

Best,

Gary

**Subject:** A letter to President Barack Obama, and the White House, regarding new, type, free energy that may be available, this is of the highest Importance. Top Secret Only. Top Clearance.

## Addendum Forward

Hi. So this is a letter to the White House that I sent by fax on June 25, 2014, sent by E-mail on June 26, 2014. It's a /copyright applied for/ letter. It introduces me as a super inventor, and mentions my previous submissions to the USPTO, that were received, utilized, and never paid royalties or given enough due recognition, and further goes on to declare and announce, that I have invented free energy, several systems of it, possibly more than ten, and proceeds to elaborate on the issue, and describe one of them in reasonably moderate detail, while mentioning several more. It describes how they are constructed and what the will be applied for. It explains the new internal concepts, and great organized technology that creates free energy and makes it truly possible may be for the first time ever; whilst ready for built first in U.S.. It requests funding for putting together, and realizing this project, or rather several different devices for several purposes, such as motive power for automobiles (( that never need to acquire fuel from a source that's external, or stationary installation for electricity (power) generation, that don't need resuppliable fossil fuel, or any other current raw energy input sources; for they are internally supplied automatically with reusable energy, and self-produced sources of continuous, green (always) fuel.)) And I want to bring to you attention the fact that the stationary power plant, and legitimate numbers of them (all green, clean, free energy fuel) can be made by October 2018 apx. So, by December, 2018, there could be a moderately large number of above described powerplants running. They will be nearly 100% clean, and eco-friendly. Eventually; if and when their number grows again, the

energy end electricity generated by them could power more than half the states in America, could go in the grid, and substantially so, and could be sold to other countries for revenue, and increased domestic product, and national wealth.

On the subject, while enjoying that wealth, another item that will be made available for acquisition, is an exquisite gigayacht, a giant sail boat, that is a sailing yacht, about 200 meters long, that is equipped with a partial free energy/renewable energy propulsion system, that has billions of miles/to infinite range without ever refueling, all included, with its engine and boat propellers working. I call it, the Oligarch Sailing Yacht. With prompt initiation of construction and manufacture, this item could sail by August, 2018.

I have invented free energy system for other transportation types, such as Jetliner, may be large ships, (working on this), and potentially, ir required, submarines. Tanks using a different, new ICE (Internal Combustion Engine), will have an unlimited range without refueling too, and are ready to be deployed. As for the decuple hybrid engine for road vehicles, that is described in the E-mail before, the timeline is as approximately as follows: Long buses and Locomotives by 2023, 60' long conventional buses by 2024-2028, Large SUVs by 2028-2029, 8 meter long automobiles by 2030, 5+ meter long automobiles by 2031, and the rate of progress may be accelerated by an average of 3 years by faster work. So, automobiles for consumers mostly in their large form could potentially go on low-production sale by 2025 with high acceleration of the rate of effort, labor, and quality funding. In the meantime, I would like to put on sale (So as bringing to the market) for buyers' consumption and usage, factorizations and fractions of the entire (hybrid x 10 power plant engine system), using easiest to manufacture features and aspects of the complex power device which generates free energy when whole), and bring to market using upgrades to the current brands including makes and models, along with some brand new designs; start selling "Double Hybrids", and further on triple and quadruple hybrids (may be

even call them that, and market them as such), that significantly increase standard mileage and MPGs, may be 80 miles a gallon for a 325-500 horsepower car. Eventually, the efficiency will go much higher. However, the cleaning of the outside air, and reduction of the pollution is going to happen instantly, along with decrease in greenhouse gases in the atmosphere. These first sales shall bring in the revenue, that, partially, will be reinvested, to complete the general project, which is a complete fuel input-free automobile. As for revenue in general, I would prefer to take in 70 percent of the haul, but will be Ok with 46%, to finance further development and progress.

I am going to need several hundred billion dollars a year for at least 5 to 10 years to fund the project, may be partially supplied, by a new, "free energy tax", however, I might finish a prototype of one or more examples of free energy cars, for 10 billion dollars or even much less depending on how it goes. I am going to need the support and involvement of several tens of thousands of engineers, however could do with just a few hundred, but hold the extras in reserve, just to get everything right and perfect, and accomplish all goals. Employees not utilized, is going to save most of the expenses. I will also require collaboration and participation of all 3 major U.S. auto manufacturers.

Due to the high secrecy and sensitivity of the information, that I've invented, and part of which I am dealing with, and will be developing and may be working with much more, I would like to request the protection of the U.S. Secret Service on the highest level.

About the most important aspect about what I am putting forward, is that I have developed, at least in theory, likely a lot more, a technology that is going to help, if not do the work entirely, of eradicating most if not all pollution in the world, whilst additionally reducing the polluting substance that comes mostly from emissions, which is carbon, from more than 400 parts per million to 245 ppm, or even less, on the entire Earth, potentially going all the way to zero, which, may be will bring a new Ice Age, due to the lack of greenhouse gases, it can possibly be done with

this technology, however; fear not, because I am not going to do that as a favor to the American People.

All I want to do as an extra benefit to reducing the price of fuel, (it will be metered for miles driven for my profits (shared with other parties); and reducing or even tapering off dependence on foreign oil, mostly oil from Arabs; is improve the Earth's atmosphere, climate, and air, plus air quality in general, so that there can be saved by me, and some supporters; about 50 million people who succumb to atmospheric pollution each year, and save them every year. Global warming will also be eliminated in entire.

---

\_\_\_\_\_ I kind of suspect that some of my recommendations of what to do with and about along with striving toward new technologies, from that letter; and other work that I've done; some of it written and not yet sent; are being used to develop new items, new products, and new technologies, without me receiving royalties, recognition, and honors; and I would like, if true, for this to stop, and to start receiving royalties, awards, and other positive things where appropriate.

---

I will need funding, laborers, a set of engineers, a payment for work already done, and supports from outlets and means of mass information. My phone number is [Ex. 6 Personal Privacy (PP)] Landline, Same Fax, (310) 570-3752-wireless, If I don't pick up, please leave a quality voicemail. You may E-mail me, or write to my address.

Extremely Classified, Top Secret, Level 1 Clearance.

His High Honor Attention: The White House

Sir Gentleman Mr. Nathan, "Austin" Barshak For the Oval Office

Ex. 6 Personal Privacy (PP) Top of the Document stack

Santa Monica, California 90403-1349 First read, top priority

U.S.A. Front of the desk

Phone: Ex. 6 Personal Privacy (PP) (Landline)

Ex. 6 Personal Privacy (PP) (Mobile)

To: Mr. President Barack Obama.

From: His High Honor, Sir Gentleman Mr. Nathan Barshak

Hello!

It is an ancient saying, that everything secret and hidden, eventually becomes known. Keeping that in mind, I would like to, how should I put it, have the whistle blown on myself. And should I also mention, this is the good news. It's all good news, in fact, today, from me. We could all use a little (although, this is huge) good news, especially with all that's been going on as of recently. May I remind the reader, preferably Mr. President himself, that this letter is entirely classified. If you are looking at this letter, and reading it, and you are not the President, please pass this on to top of the stack of the, " must read" documents in the top of the front of the President's working desk in the Oval Office. "Top of the List" style. It will be better if you do so.

And now, without any further ado, here's it all. I am an amateur inventor, among other things and activities, although an amateur only by broad definition; likely irrevocably the biggest and greatest inventor of all time. I am better at this than any amateur of professional, or just about any other type of inventors around. And I am about to become pro, perhaps exactly as of this writing. I've been imagining things for more than 3 decades, writing, some of them down, and even drawing sketches, examples and designs on occasion. I've come up with many. I was in the process of applying for one or several patents in 2003, depending how it was layered, however I ran into the Bureaucracy and excessive complexity of filing a patent with the Patent Office. I submitted the initial materials and documentation, however I have never received the agreeable mention and confirmation. I am making an educated guess form recalling what had happened, that, the application processing agents at the Patent Office have taken and studied, evaluated what I offered them for consideration, and processed, put together and utilized what I had explained to them, sold it, and have been leasing out and vending the services this system offered; while doing so all under the table. From that point further, these agents likely accumulated a small country's annual GDP's worth of revenue. This is revenue that is up to this point, untaxed. Your government and the IRS/inquisition agents, can attend to this later.

Anyway, now to the matter at hand. I have invented free energy. I have invented several ways of it. One of them is with a car that drives without using gasoline or any other refillable fuel. It keeps the internal combustion engine, and is driven just like the "normal, regular" cars today; however, it doesn't need any external fuel source, (once it's broken in by the dealership), and it is completely clean, and 100% non-polluting and entirely green. It uses what I call a ""Decuple" hybrid"" engine-powertrain; ("Double Hybrid" would be x 2, "decuple", would be x 10). It uses (biggest spoiler of all time alert) a 10-stroke cycle, V-10, (or V-20, v-30, etc., (multiples of 10,)) for performance, 5 liters to about 100 liter (it's all-encompassively clean). I call it "A Perfect 10 ICE (Internal Combustion Engine)", and this is a trademark filing preview). Also, the preferred performance displacement (size), of the engine is 10 Liters. (Roughly around 572 Cubic inch

Displacement Volume.) Certain powered engine strokes on this design are not exactly combustion, however they might turn out even better.) (You will need to call me to find out more.) At first this system increases the mileage (time-table-wise), where the MPG increases suddenly, to about anywhere in the range of 100 to 10,000 Miles-a-gallon, for a full size car, and afterwards, then polishing and fine-tuning of the system, closes the energy loop, and the Automobile run with no external fuel. During the prospective timeline, a large semi-truck-sized van with high mileage (getting high mileage), and with a start-up of these technologies, and the combinations thereof, could be testing and running by 2018, and a very-high-mileage 24 foot-long-sized van form vehicle could be running by 2024, and a first large-car-type vehicle running on nearly or fully free energy could be testing as a prototype by 2031-2032, however, with big, sufficient, adequate investment, the progress on this innovation of technology system could be moving at double the speed, and on some portions and aspects at triple the speed, and you could see the first experimental testing of a revolutionary new large scale ride with between 100 and about 750 MPG, during your administration.

I must mention, that with a higher investment, the main version prototype could be working and running even faster, further preparing for the beginning of the build of a production model, providing the cumulative contribution, of the three main U.S.A. automobile companies-Ford, Chrysler, and General Motors, ("the Big 3"), and they will also probably need to invest some cash. Also, progressive assistance of the main Japanese, and Western European car companies would be desired. I don't want to give too much away, however, I will mention, that the new type and generation automobiles, are going to use a completely clean, responsibly acquired, and internally (under the hood) replaceable fuel source, from a completely clean raw material, which could even be generated and created in house in terms of being manufactured and created, additionally implementing gas and fluid absorption, utilizing equipment and mechanical parts inside within the vehicle. The car powertrain can include, among other things (and there better not be anyone looting this from me because, this conceptuality, is in pre-patenting stage nation-wide), compressed air compacting, generation and storage system, heavy (4.5 or more ton car hybrid braking electrical generation, a gen set, ultra-cold liquid fuel tanks, solar panels, fuel cell generator, and a "Johnson" motor. Plug-in and conventional dual-fuel ready charging will also be available, however most of the time not needed.

I also created a way (actually had come up with a way in theory, with almost entire positive results nearly 100% guaranteed), to generate electricity within the conventional steam turbine power plant without using coal, methane gas, or diesel, or any other fossil fuel; relying instead on a new (for this usage purpose) clean fuel to generate heat in the boiler (of the turbine unit; for creating steam), (and here now the biggest secret in existence to date) and afterwards using a fraction (about  $\frac{1}{4}$ ) of the turbine generated horsepower, to power an auxiliary electricity generator, send it (the new generated power) into storage to a (large capacity) battery, and soon after employ this electricity to create new amounts, with more of it, of the same fuel used in the initial process, putting the fuel to work afterwards, and therefore closing the free energy loop. See, when a quarter, or a tenth, or less, of the typical power is applied to create new fuel, after the cycle is complete, the power plant produces several times the energy, as was implemented to fabricate the fuel, and free energy in term would be achieved when the power plant turbine produces 101%, (apx.) of the energy is consumes to function, by definition; when friction issues are taken into account, for practical purposes, the system may need between 200 and 400% extra energy production, to create appreciable, and experienceable free energy, and my proposal device concoction produces 800% or more of the energy put in. Much more, when on certain upgraded and improved energy plants, (and increased potency boiler systems, including their passage construction.) This assembled apparatus and creation, leaves no pollution of any kind, no residue, or evaporation/fumes; or externally emitted fluids or matter; when done with the right stuff, all of which for the technique and instructions I can mostly provide, and what's remaining will be assisted and counseled for completion of by me, to be finalized within several months. Finally, is the first free energy case. The first prototype of this assembly could and can and may be will up and running in 18 to 24 months. This concept if realized, could be capable of finding application in civilian, maritime (marine), military and aerospace industries, plus reconnaissance, and deep space utilization. Far more specifically, the above mention composition, can be applied to combine with and to power Navy ships, and transport, marine airplane-

carrying and launching vessels, while using this just suggested steam engine to provide power or complement power to the mentioned above vessels instead of nuclear reactors and nuclear generated heat-powered turbines. This new tech item could also be used on U.S. military submarines, as well as freight ships, cargo ships, oil tankers, and very large freight trains. It can also be used on very large airplanes. Probably, on the propeller types first. Eventually, it be almost certainly possible (in about as little as 3 years), to make a jet (turbofan) powered airplane, that is powered by this free energy, as well as hydrocarbon, or similar, fuel made on board, of the airplane in the fuselage with free energy, and this Jumbo jet, could theoretically, and provisionally-expectedly, stay (fly) in the air at standard airliner altitude potentially forever. Now there is a secret to making this airborne transport vehicle; and I will be capable of mentioning this later, after I have acquired some additional extra trust in the White House administration, in terms of their ability, comprehensiveness, and readiness, to work with me and support me, as well as provide intellectual property registration assistance regarding the main current issue, and project, that I am now discussing. Coming back to the application opportunity for the free –energy ready and capable, steam-powered electricity generator, this can also can applicability, in large Space shuttle orbiting travel, Space Station (international or other, possibly future domestic), Outer space capsule explorer, or later on in possibility, an interplanetary, far off very deep space voyager, which through this system, could provide the far cosmos flying exploration vessel electrical and synthesized (with electricity) fuel power infinitely. The power plants of this time on Earth could potentially, with proper maintenance, and supervision, potentially work, forever.

(Eventually, self-tuning, self-repairing, and self-maintaining electrical generation assemblies will arrive.)

These builds could outlast the current solar system, and further on cosmic builds could outlast the current, modern Universe. It's not that I focus on this, I must mention to bring up and emphasize have reliable these structures are.

Proceeding further, I've come up with an alternative, motive power source to the U.S. Army's main battle tank, the M-1 Abrahms tank, and it is also a replaceable, free clean energy way to derive torque and propulsion energy to navigate and drive the tank. Because this energy doesn't run out, you can have a tank with nearly and virtually infinite range, that probably never needs to be refueled, as well as very rarely inspected, and nearly never conduct the motive power source maintenance; so the Army doesn't really need a supply chain to follow the tanks wherever is goes and especially into battle, enabling the tank to travel on its own very great distances, perform its function, mission, and job, and returned likely unharmed many thousands of mile away and down the line, in the minimal amount of time. The engine for this tank uses several rotary (Wankel) type, Internal Combustion Engines, which are powered by steam expansion instead of hydrocarbon fuel, producing between 1200 and 3600 horsepower, or more. (And a ton of torque, several thousand feet/pounds of torque, more specifically.). The inside of the engines is heated to 1200 to 1700 Degrees Fahrenheit, or more, depending on requirements, and also demand, and after that a droplet of water is injected (as fuel)/dropped in every combustion chamber that is in the right position (slot) for this, the water expands a few thousand times instantly on contact with the surface and within a second in volume, creating the same of very similar effect as several drops of diesel and some compressed mixed air would do. After this happens several times, the Wankel Engine core, with does the motive power moving of the applicable crankshaft instead of the piston, the flywheel begins to spin, with about quarter to half of the rotating energy applied to spin and electrical gen set, which generates electricity, that is stored in an extra battery, the power from which is either used directly for heating effect of the plasma that goes in the inside of the Wankel spin wheel rotors, foundation area within surfaces, and sometimes the outer walls if the combustion area to heat all of the surfaces to a minimum temperature, for the above mentioned expansion to have it be possible for this volumisation action to take place, or the electricity from the battery generation a certain chemical compound material, a secret substance that is fired directionally toward the casing which is containing the plasma, and this heats the plasma to upward of 3600 Degrees Fahrenheit, and which the heated charged plasma is moved magnetically, and with propellers, or both, into the axis, of the Wankel spinning unit, providing sustained, continuous reheating, and maintenance of proper expansion-eligible temperature inside the what's commonly is referred to as the Wankel combustion chamber, after which the plasma travels back

into the piping, to receive reheating and; with all of this done continuously, until the plasma is going through a permanent, repeating load performing cycle.

With using this system, the Army could drop off an M1 Abrahms, tank, or many of them, in or near Beijing; in South-East China, and enjoy them traveling without refueling, and may be without even stopping, to Greece, for example, traveling continuously and fast for apx. 9000 miles, doing their work quickly, and returning back to Beijing, ready to be picked up by the U.S. Navy Marine transport ship.

Now, additionally, the altered above-mentioned M1 Abrahms Tank can be outfitted with the new, recently launched "Local Area Defense" Laser firing gun, manufactured from this year by Lockheed Martin.; or a dry surface and land derivative of this gun can be implemented, and because this weapon, mainly only uses electrical energy for its Ammo, usually at 10 KW, per hour level ( however this can be increased to 500 KWatts of might and power or more for dry land usage,, this gun can be used continuously by the above mentioned, Altered motive power Tank, because the engine conceptuality, that I had just described, has many hundreds of Kwatts/hour of electricity produced every hour and this laser weapon gun can be fired with frequency. Additionally to this, several other, more powerful types of electrically-powered/base lasers can, be fired for this altered M1 Tank, including Surface-to-Air Lasers, as well as rail-guns; this on probably a somewhat larger tank; even though this tank could provide auxiliary charging power to a much larger modern artillery gun traveling in the with it, driving next in the Battalion as a nearby supporter in the brigade, and ready to be serviced, armed and fielded/deployed.

Now, since from what I described, it would be really easy, or much easier to make this kind of power unit to be fitted on an M1 Abrahms Tank, I will be satisfactorily, accepting royalties, as soon as this type of Tank is fielded.

Now that's mentioned and done for the eternal range Tank.

My Intellectual Property goods are of the highest quality.

Returning to the free energy car, and with mention of the super-clean electricity generation system, I will need funds to develop this system, and especially to do it quick. Keep in mind, that this is money strictly for the manufacturing facilitation, and fabrication of these new technologies proposed by me, and the money is drawn from an account or a fund as needed, and spent carefully, and not spent on other things.

So Normally, this, system and it's prototype, could be arranged, built, and constructed for between 10 billion and 100 billion dollars, for all I know I may be able to accomplish for around \$100 million, and fit the budget in satisfaction, for way under 1 billion, dollars, however, due to the way things can go and there be glitches, being that I am in America, I would like to have access, or at least the project to have access, to an account that can be tapped for any additional need, or if new hurdles, or unfinished deeds, or extra difficulties arise, even briefly, so to have within reach of support, when required, a draw (for the (project at hand) ability of 5 trillion dollars; even though most likely, I know, and in fact, I am confident, that I will not need most of it to finish the job, and to complete this undertaking effectively, I might need only about 100 billion dollars or even less, and with most small things that might come up, I will need not much more than 100 billion dollars, however, I want to have that extra reserve, just to make sure that I get this done right, because I am for the most part a perfectionist, and I like to get things finished and accomplished in a complete way, with results that are entirely fine, bespoke, and even amazing.

If and when my free energy cars start driving on the road, with makes and models coming out, and begin being leased, and purchased, they will have a meter running, on virtual gas usage, premium high-end, entertaining performance-driving, and mileage, and consumers will pay an average of \$ 2.90 –a-gallon, with supposed average mileage of about 28 miles-a-gallon. I will pocket about 50 to 60 % of raw profits from the meters. Most of the rest will go toward paying off the R&D expenses. Some will go the automotive manufacturers that were participating to reimburse their investments. A small additional amount will go into a fund that aims to provide extra financial security to the new factories, design centers, and power plants. Some more will go into a fund for any upcoming additional needs for security at the power plants and factories provision. About half or a bit more money for the power plant revenue from the electricity sold, will go into my personal funds. I will

occasionally pay some additional expenses, affiliated with managing and running the power plants as and if they arise.

And now some of the reasons for agreeing to my offer.

At this time, the U.S.A. is purchasing more than half a trillion dollars' worth of Oil a year from terrorists. Anybody that sells (as a group) 60 trillion dollars' worth of oil at a time and doesn't sell anything else, and doesn't even manufacture anything else (and may be doesn't even know how to manufacture anything else), (and this is during a 10 to 18 years period, taken as one,) for example; is a terrorist.

America is using most of its own oil, which on some occasion it sells for use domestically, and the reserves are dwindling.

The upcoming controversial Keystone XL pipeline green light for construction is a difficult decision. By "signing up" instead, for my proposition to create limitless energy, that is entirely, clean, entirely replaceable energy, the decision not to go ahead with approving the Keystone XL pipeline, becomes so much easier.

In China, things are getting really smoggy; it's almost impossible to see a few blocks/miles down the road in Beijing, during main daylight. Selling stored energy to China will reverse the trade deficit of the U.S., especially the one with China. Since the energy my devices make are ample, and enough to make liquid petroleum, out of water, exhaust vapor, and even water and smog, selling LNG to China would reasonably resolve their pollution problem. If the production of what I am proposing goes under (my) full control with sufficient safety, and product supervision, as well as an excellent service track record, it will be possible to license, franchise, version of my derivative of hyper-clean power plants, to be shipped built, installed, assembled, and activated/turned on; in China.

In Japan, people are breathing 4 % oxygen air in major cities, going on 3 %. When the oxygen level in the atmospheric air, hits 2 %, many or most of them will buckle. (Normal oxygen amount in the air is at least, or around 20 %.) I will provide the licensing and franchising right to the Japanese government, and to their Emperor, get the ability to install my power generation facilities, in the electricity manufacture centers.

A electrical power line and a grid may also be installed under the Pacific Ocean, to provide electrical supply from the Continental U.S., or from the North Pacific, U.S. owned Islands, such as Guam, to have my power plants installed at these locations, and to export in large scale electricity to China, Japan, South Korea, and multiple other Asian Countries, while offering starter, discounts and incentives, to buyers who make large purchases and agreements for the longer term and duration. All of this this agreement arranging will bring billions and trillions to the U.S.A. economy assisting in quelling the burgeoning National Debt, and reviving in-between-States Trade.

These advents that I am bring forward and proposing will stop Global Warming, and also most likely reverse it, and also make the outside breathable air around the world a whole lot cleaner; and also a lot cooler, and a lot healthier; and probably end most of the droughts, such as the California drought, and the California Shortage of water. It will also prevent the shortage of water spreading to other states, and vicinities.

It will stop Antarctica from having its ice melt away in gigantic quantities, which has recently started, as an almost unstoppable chain reaction, but my advents can stop it, and can reverse it, and can create even more ice in Antarctica. It will also prevent cities like Miami from being fully submerged in water in 5 to 20 years, and it will make the current shoreline cleaner and bigger.

Bringing this deal to carry through, and to fruition, will make you, Mr. President Obama one of the most historic, if not the most historic president ever. And for of all the right, standardized and regular reasons. Not to mention the most positive reasons. If, and more like when this works, it will, be between 500 times, and several million times greater than the Moon landing. It's the Holy Grail, of Holy Grail, Of Holy Grail, repeat another hundred times; of everything.

Because of this, and several more quality, positive specifics, and my commitment to finishing right, well, and true, making a deal with me is incredible, because what I offer is incredible, and amazing, and I finish and top off my purposed creations, in the most incredible, and exciting ways. There has never been anybody like me, there isn't anybody quite that way and that level now, and there will never be anybody like me.

So now, about my security. Now, as you now should this most likely work, there is a lot of money in this. A lot more than 1 year's Global GDP. A large portion of it, in order for it to come to my pockets, will have to fall out of some of theirs. So, of the Arab Sheikhs, and I hope it doesn't get to that, but if it does, might not be too happy. But I don't intend to be too vulnerable, or even moderately vulnerable. At this time, I would like to officially request the support of the U.S.A. Armed Forces, including the Army, and all five branches of the military, the FBI, and the rest of the 17 or so Intelligence agencies, the Army Reserve (if and when applicable), the National Guard, Regional and Local Law Enforcement (Vicinity, and County type preferred), and to reap the benefits in full ( and this is not so official, kind of under the table), of U.S.A. Nuclear Deterrent, and the specific individuals, and defense arsenal items. (the portions of it), such as the Navy Silo positions, the warheads, and the ICBMs; in which scenario I would be predisposed to, at least and preferentially more ICBMs, aimed, additionally including with GPS Navigation, at all the major Arab populations centers, places of travel gatherings, and world national Capitals (of the Islamic and the Arab World.) And may be it would be best if they even knew about this; and eventually they will definitively not complain. (About what I am doing). A heavy hand is the large portion of what most Arabs understand. Domestic protection is also very important too; from Illuminati, their derivatives, the Literati, radical and ultra-radical freemasons, radical rogue technocrats, and their derivative branches, corrupt portion of the L.A. Area Police, Nationalist various mafia groups, Jewish extremists, Corrupt Israeli interests ( may be working secretly, for Islamist "Employers"), wandering around and prodding ( in other income opportunities) Mexican Drug and Industry Cartels; trespassing the Baja border gangs returning from Guatemala, all kinds of Illegals smuggling themselves into West Los Angeles through the Marina Del Rey's Sea Vessel Marina, North Italian 'Ndrangheta and East Coast Crime "Families", (and local gangs trying to infiltrate into Santa Monica).

At this time, I would like to officially make my request to get protection from the U.S.A. Secret Service, because protecting me should be the number 1 priority of the U.S., and the most important priority of the world. Also, my well-being should be the number one priority of the U.S., and one of the reasons for that is that I am the only, so refereed to, premium person in the U.S., and come to think of it, the only "premium" person in the world.

And I need to explain something. Fine Secret Service protection doesn't mean that they only work security on my behalf when I am lying down, or sleeping, or at home, and on that particular day not having any fun. Good Secret Service Protection, to me, means, that I can do what I like, go out, be entertained, have the opportunity to enjoy myself and have a good time, and after all that still have the full and entire protection of the Secret Service. It also means that if I go out to a café, or a bakery, or a bistro, that my food will not be poisoned, or laced with something, or looted, or vandalized, or tainted with something non-wholesome.

It also means that should I, or when I go to a doctor's appointment, I don't have any other options, to decide what doctor to choose, today, whether it's Al-Qaeda, # 2, or it's Al-Qaeda # 3, and one day I arrive at the doctor's office, and realize, that it's my such a lucky day, because today there is, well, kind of a substitute, and it's only Al-Qaeda # 5. Lucky day, what a lucky me.... There should never be a situation where the only choice I have in deciding on a new doctor is where he ranks in the top 10 in the Al-Qaeda organization. This is something that has to do with what king of medical insurance I have and in in what area (I look for a doctor). This is something that the Secret Service, should take care of every time. The Secret Service should take care of all these awkward issues.

And now, the incentives of considering of offer, or even more agreeing to follow through on it, or even that much more, accomplishing this, and getting it done.

Now since corruption in office in office in not allowed, I am going to have to go around it, although anyway, I wasn't going to offer anything that is generally considered outlandish; and it's all very laid back.

I am offering to help upgrade the top speed of the Obamobile, from the current 60 mph, to, gradually, through steps, to 165 mph, and eventually much, much faster. Although if you don't want to ride any faster, you don't have to.

I am offering to help you find employment in the private sector, may be even in one of the nicer parts of the Los Angeles Are, after the second term in finished. No other former president has ever done it quite like that.

The position suggested and offered, is second manager of a local pizza place. There are several catches to it, and it sounds right, and it's kind of clever.

Now if my enterprise by that time gets going, I am offering a position opportunity, and of the top ten candidate, in a 10 million dollars a year security position, in overseeing my free energy enterprise and coalition, and a supervisory position in preventing looting, vandalism, and particular information looting in several or one of my new, fresh electricity generation sites.

I offer assistance in putting in a positive, good word of protection, in the impeachment case that the republicans have started, and voted to put into action several days ago. I will offer a suggestion, and hopefully an influential opinion, to bring in an accord, that will see you be able to remain in office until the end of your term.

I offer a volunteer, secondary position, if my proposition gets approved, to have you get a second, community service type job, in working with the "Big 3", U.S. car companies, to coordinate the efforts, to bring the best possible equipment, that can be assembled, fitted to conform with one another, and comprised as a group of parts of equipment, that go under the hood of the free energy car, to assist its power plant in getting the maximum efficiency that can be achieved. This trophy position brings a lot of satisfaction; and, especially if done well, can lead to new positions with other industries, on other subjects, and with other, different companies. It will bring a sense accomplishment, additional to any of now, sense of fulfillment and confidence. And finally, a free tip. If you would be wandering about trying to improve the performance of the Obamobile now, go to the website, [www.prolinercar.com](http://www.prolinercar.com) and ask about their corvette-based 454 for street use; also a racing 572 converted for street use, it gets about 800-to 1600 hp., and should get the Obamobile going at a reliable 125 mph.

All right, that's all for this time. Thank you for reading, and if you having questions, or even if you don't know which questions to ask, please call me at the telephone number Ex. 6 Personal Privacy (PP) landline), or mobile Ex. 6 Personal Privacy (PP)

Ex. 6 Personal Privacy (PP)

Please remember, that this is the most important correspondence, either you or the White House has ever received. This is level 1 clearance (only for the Vice president and the President), and it has parts of it that are "-100" clearance, and possibly even higher if and when identified, which is the highest clearance anywhere in the world, possibly of all time; and this correspondence is conducted on the highest national level.

Sincerely,

Nathan "Austin" Barshak

**Subject:** REG's CEO request for a meeting

Andrew, sorry to bug you. I was wondering if you have time to meet with the largest US producer of biodiesel? Randy Howard is REG's CEO and he is here Thursday June 21. Randy will be testifying before the House E&C Committee on June 22. Any chance your schedule would permit a short meeting with Randy? Thanks. Jim

Renewable Energy Group Inc.

**Subject:** Invite--Western Caucus Foundation Energy Forum in Colorado  
**Attachments:** 2018 Denver Energy Event Info -- Hand Out.docx

Andrew,

We are pleased to invite you to speak at the Western Caucus Foundation's Energy Forum to discuss **"America's Energy Dominance Fueling Prosperity"** with Congressional Western Caucus Chairman Paul Gosar (AZ-04), Representative Mike Coffman (CO-06), Representative Ken Buck (CO-04), Representative Scott Tipton (CO-03), and Senate and Congressional Western Caucus Staff on Friday, June 29<sup>th</sup> in Englewood, CO. Please see the attached event invitation with current agenda outline (a detailed agenda will be released soon).

Specifically, we would like you to make comments regarding on how the EPA is accelerating America's energy renaissance which will benefit states, local governments, and residents. We'd also like you to participate in a round-table discussion on why pursuing an all-of-the-above energy approach to American energy benefits consumers, the economy, and the environment. Our events include presentations and constructive conversations on federal regulatory and public policy issues that have been typically classified as "Western," but are now having an impact both the economy and land use in other parts of the country.

This event is by invitation only. This event is planned to fully comply with congressional ethics rules and other applicable laws.

The Western Caucus Foundation (WCF) is a 501(c)(3) not for profit organization committed to educating public policy makers and communicating with the public in an effort to enhance, sustain, and preserve the principles and culture of the American West. The Foundation provides support, education, outreach, and networking opportunities to advance the public policies important to the West, and offers Western Caucus members, staff, and stakeholders a non-partisan and non-political organization to facilitate discussion of critical Western issues through a robust agenda of meetings, conferences, education programs, and communications.

Thank you for considering including this event on your busy calendar. Please contact me at [info@westerncaucusfoundation.org](mailto:info@westerncaucusfoundation.org) or Ex. 6 Personal Privacy (PP) regarding you attendance or questions on the event.

Sincerely,

*Darrell Henry* | Executive Director

**Subject:** I Spoke to Director Pruitt after Senate Appropriations meeting regarding top Environmental Issue

Andrew-It was a pleasure talking with Director Pruitt briefly after the Senate Appropriations meeting on May 16th about wireless radiation's cancerous and neurological health effects which **he said he was familiar with from his work as Attorney General of Oklahoma. We are requesting a meeting with Director Pruitt to discuss this critically important issue.**

I am the Outreach Director for the Brain Tumor Association (Calibta.org) and I collaborate with more than **200 scientists and doctors who are expert in wireless radiation health effects (5Gappeal.eu)** I and our expert Cancer Epidemiologist, Physicist, Toxicologist, Cellular Biologist and Medical Doctors will be participating in the meeting with Director Pruitt.

Given the widespread use of wireless radiation and **CLEAR EVIDENCE that wireless radiation is a form of air pollution that is essentially electrosmog** and recent scientific evidence proves that this electrosmog can cause cancer and neurological disease.

**NTP Peer Review:** Actions from Peer Review of the \$25 million NTP Study and Technical Reports on Cell Phone Radiofrequency Radiation March 26-28, 2018 Click [HERE](#)

Wireless radiation's Carcinogenicity, Neurotoxicity and ability to impair immune system functioning as well as damage reproduction were identified as problems by the EPA in the early 90's when they had programs researching and reporting on the issue:

**EPA Report: ELECTRIC AND MAGNETIC FIELDS: AN EPA PERSPECTIVE ON RESEARCH NEEDS AND PRIORITIES FOR IMPROVING HEALTH RISK ASSESSMENT** Click [HERE](#) For EPA Report.

And at the time the EPA's air radiation department was outspoken about the inadequacy of our safety guidelines and the possible dangers related to cancer and other serious disease:

**Letter From EPA's Center For Science and Risk Assessment, Radiation Protection Division:** Click [HERE](#)

More recently, we have this report from 7 leading German scientists showing the direct damage to our environment, wildlife and our ecosystem that wireless radiation can do along with years of studies showing that cell tower radiation harms wildlife.

**BEEES, BIRDS AND MANKIND Destroying Nature by 'Electrosmog' Ulrich Warnke:** Click [HERE](#)

**US Depart of the Interior Letter** pointing out how cell tower radiation harms birds: Click [HERE](#)

We feel this **meeting is imperative to have NOW** with the forced roll out of 5G Wireless Technology which will require a cell tower transmitter every 500 ft **connecting millions of new transmitters in everything from household appliances** to baby bottles emitting high density wireless radiation (24-90GHz) massively increasing our mandatory exposure to harmful wireless microwave radio frequency radiation. All of this new

radiation exposure is being **exempted from Environmental**, Health and Safety review irrespective of the thousands of studies showing harmful biological effects to all living things ([www.bioinitiative.org](http://www.bioinitiative.org)).

We are asking for a meeting with Director Pruitt to discuss these issues in more detail and most importantly to **discuss safe alternatives** that will minimize rather than maximize our exposure to wireless radiation. We understand that Director Pruitt granted a meeting himself with Moms Clean Air Force and we are hoping to be given the same opportunity.

Please let us know **as soon as possible when Director Pruitt can meet** with our experts to address this very serious issue that affects our entire population. Please let us know that you received this email and it was not caught in one of your agency filters. I look forward to your response.

Sincerely yours,

Kevin Mottus  
The Brain Tumor Association, Calibta.org

EPA Guests and Colleagues,

You are invited to join for Andrew Wheeler's ceremonial swearing-in as Deputy Administrator. The swearing-in will take place **Friday, May 4, 2018 at 11:00 am** in the Green Room. Some light refreshments will follow.

In order to ensure access to the Green Room and an accurate head count, please RSVP by replying to this invitation by COB, Monday, April, 30.

Guests – please arrive 20mins before the ceremony to: 1200 Pennsylvania Avenue Northwest Washington DC 20460 – You will enter the William Jefferson Clinton North(WJC) building. You will check in and go through the security screening, please present your ID to the security officer and they will notify your guide of your arrival and we will escort you to the ceremonial suite.

**Subject:** Invitation to Business Roundtable Meeting

Hello Andrew,

I'm not sure if you'd remember me, but we met a few times during my tenure with Sen. Alexander when you were leading the EPW Committee Staff. Congratulations on your recent Senate confirmation.

Attached please find an invitation from the CEO of International Paper, Mark Sutton, to speak to Business Roundtable's CEO Committee on Energy & Environment on the morning of Wednesday, June 6. You should have received this invitation already by way of Administrator Pruitt's staff, but I wanted to send a copy directly to you just in case.

Please, let me know if you have any questions. We hope you can join the CEOs on June 6.

Sincerely,

Now the Big News! . . . I am running for a House Legislative seat, Wyoming House District 5. The current person in the seat is running for the state Senate t so it is an open seat. At this point, there are three running in the primary which is August 21. Filing is May 17-June 1, so there is opportunity for more to jump in. I am hoping you can send me any advice, information etc on the big transportation/ enviro issues out there. I will admit that I am a bit out of the loop.

**Subject:** Following up

Hi Andrew,

It was good to see you last Wednesday at the meeting with IPC member electronics industry executives. I am putting together a package of information about the TSCA and other EPA issues of interest to IPC and the electronics industry. I should have something to you in a day or so.

I also wanted to follow up on the emails I sent to you earlier about scheduling a meeting with you for the founder and CEO of Clean Harbors. I had not heard back from you and raised this issue with John Konkus over coffee a couple of weeks ago. John is an old friend from when we both worked together on the Hill back in the 90s. My note to him following up on our discussion is below which you may have already seen from John.

As I mentioned to John, the purpose of the meeting request with you was to introduce you to and the senior EPA leadership to Clean Harbors and their issues but also to see if we could schedule a site visit to one of their facilities. I outlined some options for such a visit for either you or Administrator Pruitt as summarized below. I emphasized that this is a positive environmental and jobs message and shows strong cooperation between EPA and industry. Let me know what you think.

Best wished in your important role at the agency.

Gabe

**Subject:** Clean Harbors Meeting-Site Visit Request

Dear John,

I am following up on our conversation about trying to schedule a meeting or site visit between EPA senior leadership and Alan McKim, the Founder and CEO of Clean Harbors, which is the largest environmental services company in the

US. Some background on the company is found [here](#) and covers both their environmental service work and their recycling of used oil and solvents through their Safety-Kleen subsidiary.

As I mentioned they were formed to help with the cleanup of Boston Harbor. They have been involved in virtually every major US environmental cleanup project over the past 35 years. This includes the Exxon Valdez and Gulf oil spills and numerous national hurricane and disaster relief efforts. They provide cost effective environmental services to the EPA , the Department of Defense, FEMA and other Federal agencies and almost all of the Fortune 500 companies.

As I mentioned, we have a meeting request pending with Andy Wheeler but our goal is ultimately a site visit where we can highlight the positive economic and environmental message of doing good by doing well. Two possible meeting venues are:

- Safety-Kleen's East Chicago, used oil refinery in Northwest Indiana, the largest such facility in the world, where dirty used oil is refined into high quality lubricants that have gone into US Humvees and Indy race cars.
- Clean Harbor's Lone Mountain RCRA permitted Hazardous Waste Landfill, in Northwest Oklahoma, which is one of the largest RCRA landfills in the country, including a review of the mile long rail transfer facility constructed specifically to handle the 3 million cubic yards of PCB contaminated dredged material from the Hudson River and Hudson Falls Superfund sites processed at the facility in a cost effective and environmentally safe manner.

As I mentioned, they have had an excellent working relationship with various offices and regions, including work done recently with Patrick Davis and the career staff within OLEM and the CSPP, as well as with Susan Bodine when she served as AA for the predecessor arm of EPA that housed Superfund and RCRA programs. We would be happy to work with you on dates that might be best for Alan McKim and you all as well. Let me know if you need a more formal letter and whom else I may need to reach out to on this. You had mentioned someone I think in OLEM (Steve??) whom I might want to also connect with and I failed to jot down the name so let me know.

Best,

Gabe

**Subject:** RE: EXTENDED DETAIL OPPORTUNITY IN THE IMMEDIATE OFFICE OF THE ADMINISTRATOR - Program Assistant, GS-13

Title	Program Specialist to the Deputy Administrator, GS-13
Position Status	Active
Office/Region	AO
Office/Division/Branch/Section	Office of the Administrator
Major Duties	The Immediate Office of the Deputy Administrator is seeking a highly qualified, proactive team player to serve as a Program Specialist. The incumbent will work closely with the Deputy Administrator and his team. The work requires good judgment to operate successfully. The incumbent will be responsible for a variety of daily and ongoing tasks that involves tracking, monitoring, and reporting the status of activities. The incumbent will be expected to perform tasks independently, and in conjunction with others. In this role, the incumbent will manage complex executive scheduling; preparing briefing materials; support meeting logistics; manage travel activities and support for special projects. Professional demeanor, stellar communication skills,

coordination, flexibility/adaptability, dedication and teamwork skills are a must.

This position is an ideal opportunity for an individual who would like to gain or broaden their experience in a highly visible and fast-paced environment. The individual plays a key role on the team and will be exposed to all facets of the organization's management as well as with other senior officials and executive personnel at both at EPA, across the Federal Government and with the private sector. This position offers the ability to strengthen your business acumen within a cross-functional environment of the AO.

Objectives

The successful candidate will assist the Deputy Administrator and triage the multitude of pressing issues as they arise. Specifically:

- Coordinate events, meetings, and presentations for the Senior Leaders.
- Communicate directly with AO/senior managers to monitor the status of priority actions and ensure that the Deputy Administrator is kept apprised of issues of concern.
- Keep abreast of important developments affecting management activities to provide sound advice, analysis, and support to AO managers on high profile, time sensitive issues.
- Manage effective coordination on special projects for the Deputy Administrator working with senior officials.

Andrew-

Hope all is well. Some merchant refining executives will be in town next week and I was wondering if you would have time to meet with them on Wednesday, June 27<sup>th</sup> at or after 3pm. Executive attendees would be PBF's Chairman and CEO, Tom Nimbley, Delta's Senior VP of Fuel Management Graeme Burnett (he oversees the Monroe Refinery for Delta), and Valero CEO Joe Gorder. They will primarily be interested in talking about the RFS. Please let me know if you have time for this meeting at your earliest convenience and thanks in advance for your consideration.

Hi Andrew,

Following up on my email from earlier this week. I'm available today and tomorrow before noon, if you'd like to meet. I'm also thinking of coming back to DC the week of June 4th, if it's easier for you.

Regards,

Yamil

Andrew,

We are pleased to invite you to speak at the Western Caucus Foundation's Energy Forum to discuss **"America's Energy Dominance Fueling Prosperity"** with Congressional Western Caucus Chairman Paul Gosar (AZ-04), Representative Mike Coffman (CO-06), Representative Ken Buck (CO-04), Representative Scott Tipton (CO-03), and Senate and Congressional Western Caucus Staff on Friday, June 29<sup>th</sup> in Englewood, CO. Please see the attached event invitation with current agenda outline (a detailed agenda will be released soon).

Specifically, we would like you to make comments regarding on how the EPA is accelerating America's energy renaissance which will benefit states, local governments, and residents. We'd also like you to participate in a round-table discussion on why pursuing an all-of-the-above energy approach to American energy benefits consumers, the economy, and the environment. Our events include presentations and constructive conversations on federal regulatory and public policy issues that have been typically classified as "Western," but are now having an impact both the economy and land use in other parts of the country.

This event is by invitation only. This event is planned to fully comply with congressional ethics rules and other applicable laws.

The Western Caucus Foundation (WCF) is a 501(c)(3) not for profit organization committed to educating public policy makers and communicating with the public in an effort to enhance, sustain, and preserve the principles and culture of the American West. The Foundation provides support, education, outreach, and networking opportunities to advance the public policies important to the West, and offers Western Caucus members, staff, and stakeholders a non-partisan and non-political organization to facilitate discussion of critical Western issues through a robust agenda of meetings, conferences, education programs, and communications.

Thank you for considering including this event on your busy calendar. Please contact me at [info@westerncaucusfoundation.org](mailto:info@westerncaucusfoundation.org) or Ex. 6 Personal Privacy (PP) regarding you attendance or questions on the event.

Sincerely,

*Darrell Henry* | Executive Director

Andrew,

This is standard. The recusal statements are all required under the criminal statute, regulations and pledge. The screening arrangement is good. Just make sure you understand the recusals and don't take any kind of gifts from anyone.

Judy

**Subject:** Background Investigation Decision Update  
**Attachments:** Background Investigation Decision Update \_5.4.18.docx

PMC Members,

I wanted to follow up with you on the latest developments regarding the outstanding issue of the placement of the Federal background investigation program.

As we have previously discussed, the FY18 NDAA required DOD to assume responsibility for DOD-affiliated background investigations which comprise 70% of OPM/NBIB's total. Discussions among OMB and EOP leadership as well as with PAC Principal agencies have led to an agreement that it is best to keep the whole program together and thus we will begin a process of transitioning the entire NBIB program to DOD rather than splitting the program between the two organizations. We believe that this is the best available option to ensure we have an efficient, effective, fiscally viable, and secure operation that meets all agencies' needs and minimizes risks. This transition can be implemented administratively.

The attached document provides an overview of this decision, which we plan to include in the government-wide reorganization plan that will be released later this month. I am also asking each of you to identify your designee for the full Performance Accountability Council, which I plan to convene on May 18th.

Please let me know if you have any questions or have any feedback.

Thanks,  
Margaret

**Subject:** Department of Energy Invitation to Attend Mercury Waste Workshop

Dear Assistant Secretary White,

Thank you for the invitation and for offering to include EPA representatives as part of your conversation during next week's DOE workshop to discuss environmentally sound treatment and disposal options for mercury containing wastes. I have been asked to respond to your request for EPA participation.

We are pleased to be able to accept your invitation. Mr. Greg Helms, one of EPA's senior technical experts on mercury waste management, will be able to join and participate in the workshop. I would appreciate it if you could share details regarding meeting logistics and any read ahead materials.

Finally, as I expect this workshop will not be the end of this conversation; please do not hesitate to reach out to me directly if I can be of any help in the future.

Sincerely,

**Barnes Johnson, Director**  
**Office of Resource Conservation and Recovery**

Subject: Invitation: Reinvigorating Open Innovation Challenges to Reduce Nutrient Pollution

Interagency Colleagues,

Lee Forsgren and I would like to invite you to a senior staff, interagency, meeting to discuss open innovation challenges to reduce nutrient pollution, and to reinvigorate the Challenging Nutrients Coalition.

Improving nutrient management and reducing nutrient pollution from urban, rural, and atmospheric sources remains a major national challenge. Your staff have been engaged in substantial interagency and public-private collaborations as part of the Challenging Nutrients Coalition, including prize competitions for new sensors, advances in data interoperability, and ways to reduce waste/releases and/or recover phosphorus and nitrogen. This meeting will provide you with an update on these accomplishments. Most importantly, the meeting will provide an opportunity for your input into the direction of this Coalition and specific future activities.

We are looking forward to working with you on this important issue. Please RSVP to Denice Shaw (EPA Innovation Team; [Shaw.Denice@epa.gov](mailto:Shaw.Denice@epa.gov)). As appropriate, she will work with your staff and schedulers to coordinate a meeting time and provide briefing materials and contacts.

Thank you in anticipation.

Richard Yamada

Subject: Invitation: Reinvigorating Open Innovation Challenges to Reduce Nutrient Pollution

Interagency Colleagues,

Lee Forsgren and I would like to invite you to a senior staff, interagency, meeting to discuss open innovation challenges to reduce nutrient pollution, and to reinvigorate the Challenging Nutrients Coalition.

Improving nutrient management and reducing nutrient pollution from urban, rural, and atmospheric sources remains a major national challenge. Your staff have been engaged in substantial interagency and public-private collaborations as part of the Challenging Nutrients Coalition, including prize competitions for new sensors, advances in data interoperability, and ways to reduce waste/releases and/or recover phosphorus and nitrogen. This meeting will provide you with an update on these accomplishments. Most importantly, the meeting will provide an opportunity for your input into the direction of this Coalition and specific future activities.

We are looking forward to working with you on this important issue. Please RSVP to Denice Shaw (EPA Innovation Team; [Shaw.Denice@epa.gov](mailto:Shaw.Denice@epa.gov)). As appropriate, she will work with your staff and schedulers to coordinate a meeting time and provide briefing materials and contacts.

Thank you in anticipation.

Richard Yamada  
Deputy Assistant Administrator for Research  
U.S. EPA Office of Research and Development

Lee Forsgren, Jr.  
Deputy Assistant Administrator

Hello Dr. Yamada,

Mark speaks very highly of you. I have read your bio and I am extremely impressed. I am really interested in learning about your career choices. Would it be possible to meet up for an informational interview? Take you out for a cup of coffee or drink? I feel insights about your career choices would help me **Ex. 6**

**Ex. 6**

I know you are extremely busy and I will work around your schedule. When would be a good day and time for you in the up and coming weeks?

Thank you,  
Hawk

Subject: Invitation: Reinvigorating Open Innovation Challenges to Reduce Nutrient Pollution

Interagency Colleagues,

Lee Forsgren and I would like to invite you to a senior staff, interagency, meeting to discuss open innovation challenges to reduce nutrient pollution, and to reinvigorate the Challenging Nutrients Coalition.

Improving nutrient management and reducing nutrient pollution from urban, rural, and atmospheric sources remains a major national challenge. Your staff have been engaged in substantial interagency and public-private collaborations as part of the Challenging Nutrients Coalition, including prize competitions for new sensors, advances in data interoperability, and ways to reduce waste/releases and/or recover phosphorus and nitrogen. This meeting will provide you with an update on these accomplishments. Most importantly, the meeting will provide an opportunity for your input into the direction of this Coalition and specific future activities.

We are looking forward to working with you on this important issue. Please RSVP to Denice Shaw (EPA Innovation Team; [Shaw.Denice@epa.gov](mailto:Shaw.Denice@epa.gov)). As appropriate, she will work with your staff and schedulers to coordinate a meeting time and provide briefing materials and contacts.

Thank you in anticipation.

Richard Yamada  
Deputy Assistant Administrator for Research  
U.S. EPA Office of Research and Development

Lee Forsgren, Jr.  
Deputy Assistant Administrator  
U.S. EPA, Office of Water

Richard Yamada  
Deputy Assistant Administrator  
Office of Research and Development  
U.S. Environmental Protection Agency
