subject Annual Examinations - Asbestos
Workers (Akron, N. Y.)

date

January 18, 1977

JAN 20 1977

The first thing you should do is review the annual examinations with Dr. Amdur and seek his counsel.

It seems to me the only thing we can do in a situation of this nature is continue to monitor the environment at the plant and continue to monitor the vital capacity of our employees who work in that environment.

In the Bluege situation, it would be my advice to review the matter in some detail with Dr. Amdur and review with the plant people whether or not in the Bluege situation there has been any change in the job assignment, the work process, or the environmental controls.
