EXHIBIT

GF-770

DATE October 31, 1973

TO
LOCATION

Mr. Frank Veronaky
So. Bound Brook

cc Mr. R. K. White - Vt.

FROM
LOCATION

Mr. J. K. Gilmore
Vermont

SUBJECT:

BAG OPENING EQUIPMENT

Attached is a brochure on the D-BAG-R made by Fairmount Engineering in Hackettstown, E. J.

I have talked on the phone with Mr. Charles Schott, President, who assured me the equipment will handle pressure packed long fibre in multivall paper bags.

Also attached is a letter from their Sales Manager expecting production of some units to be completed shortly.

You might be interested in this equipment. If so, you are fairly close to have some test runs made.

We would not be using the equipment ourselves, but are very interested as we have requests from our customers for this sort of thing because of OSHA regulations. We would like factual information before making definite recommendations.

J. K. Gilmore
