Kansas City, Missouri

Gentlemen:

We have now received your letter dated January 19th addressed originally to our Garfield, Utah Plant, to the attention of Mr. C.C. Burt, all in connection with the increase in freight rates covering the Asbestone material being supplied under our Order L-14940, requisition El Paso CD-5136.

Inasmuch as we previously authorized you to substitute the Asbestos Cement Covering it will also be necessary for us to authorize the \$49.00 increase due to the change in freight rates on this material.

We are noting our records accordingly and may we suggest that on any future changes that you address your letters to this office direct with a carbon copy to Mr. C. C. Burt at Salt Lake City, Utah marking same for ready reference, with our order and requisition numbers.

Very truly yours,

Vice President
